## RESEARCH
- Basic
- Applied
- Medical
- Grant Writing
- Administration

## EMPLOYERS
- University laboratories
- Federal government laboratories/agencies including:
  - National Science Foundation
  - National Institutes of Health
  - Food and Drug Administration
  - Environmental Protection Agency
  - Department of Agriculture
  - Armed Services
- State and local government laboratories/agencies
- Public health departments
- Hospital laboratories
- Commercial medical laboratories
- Private testing laboratories including forensics
- Independent research foundations
- Industry laboratories:
  - Pharmaceutical companies
  - Biotechnology firms
  - Food processors
  - Cosmetic manufacturers
  - Chemical and petroleum industries
  - Agricultural industry

## STRATEGIES
- Bachelor's degree in biochemistry, biology, or chemistry qualifies one for laboratory technician or research assistant positions.
- Choose courses with laboratory work.
- Get on the job experience in a laboratory and/or complete a senior research project.
- Complete a certificate training program, usually one year, to learn specialized laboratory techniques.
- Take a course in grant writing.
- Earn master's degree in biochemistry for better positions, advancement opportunities, more responsibility and higher pay.
- Obtain Ph.D. to direct research projects and lead research teams.

## TEACHING
- Elementary
- Secondary
- Post-secondary

## AREAS
- Public and private elementary, middle, and high schools
- Two-year community colleges/technical institutes
- Four-year institutions
- Medical schools

- Complete an accredited teacher preparation program for certification/licensure in biology and/or chemistry.
- Ph.D. required for college or university teaching.
- Some teaching positions in two-year institutions may be available for those with a master's degree.
- Prepare to attend graduate school by maintaining a high grade point average and securing strong faculty recommendations.
- Serve as a tutor for high school or college students.
- Learn to communicate effectively.

GENERAL INFORMATION

- As an undergraduate, seek laboratory experiences such as research projects, volunteering with professors, summer jobs, or internships.
- Participate in research programs sponsored by organizations like the National Science Foundation and the National Institutes of Health.
- Consider a certificate program or specialized master's program to qualify for research technician positions.
- Earn master's degree for greater variety and autonomy on the job.
- Earn a Ph.D. to work on high-level research projects, to direct research programs, to enter high levels of administration, and to teach at four-year post-secondary institutions. Postdoctoral fellowships may also be required.
- Learn to work independently and as part of a team.
- Develop the ability to communicate clearly.
- Gain competencies in computers and mathematics.
- Read scientific journals and join related professional organizations.
- Combine an undergraduate degree in biochemistry with a degree in law, computer programming, business, education, information science, or other discipline to expand career opportunities.
