INTRODUCTION
This handbook outlines the requirements and expectations for students enrolled in the University of Mount Union CAATE Accredited Athletic Training Program (ATP). This handbook is revised annually and each new edition supersedes all previous editions. The most recent edition is available on the athletic training major page on the Mount Union website. http://www.mountunion.edu/athletic-training-major

The Athletic Training Program faculty and staff pledge their support to the goals and objectives of the Human Performance and Sport Business Department in its pledge of support to the Mission of Mount Union by providing the following Program Goals and Objectives of the Mount Union Athletic Training Program. Athletic Training is: The Science of healing...The Art of Caring...The Intensity of Athletics!

VISION
The Mount Union Athletic Training Program (ATP) shall endeavor to prepare athletic training students of recognized excellence in the context of a small, private, liberal arts, coeducational, residential, undergraduate learning environment in the context of Christian faith. The Mount Union ATP shall strive to be a program of recognized excellence by virtue of preparing future Athletic Trainers who will continue to learn after graduation, make significant contributions to the profession, and serve their communities with distinction.

MISSION
The primary mission of the Mount Union ATP is to prepare students to successfully sit for the Board of Certification (BOC, Inc.) examination for athletic trainers and to prepare them for the contemporary professional and ethical challenges of employment and practice as a Certified Athletic Trainer.

NATA CODE OF ETHICS
Preamble
The National Athletic Trainers’ Association Code of Ethics states the principles of ethical behavior that should be followed in the practice of athletic training. It is intended to establish and maintain high standards and professionalism for the athletic training profession.

The principles do not cover every situation encountered by the practicing athletic trainer, but are representative of the spirit with which athletic trainers should make decisions. The principles are written generally; the circumstances of a situation will determine the interpretation and application of a given principle and of the Code as a whole. When a conflict exists between the Code and the law, the law prevails.

PRINCIPLE 1:
Members shall respect the rights, welfare, and dignity of all.
1.1 Members shall not discriminate against any legally protected class.
1.2 Members shall be committed to providing competent care.
1.3 Members shall preserve the confidentiality of privileged information and shall not release such information to a third party not involved in the patient’s care without a release unless required by law.

PRINCIPLE 2:
Members shall comply with the laws and regulations governing the practice of athletic training.
2.1 Members shall comply with applicable local, state, and federal laws and institutional guidelines.
2.2 Members shall be familiar with and abide by all National Athletic Trainers’ Association standards, rules, and regulations.
2.3 Members shall report illegal or unethical practices related to athletic training to the appropriate person or authority.
2.4 Members shall avoid substance abuse and, when necessary, seek rehabilitation for chemical dependency.

PRINCIPLE 3:
Members shall maintain and promote high standards in their provision of services.
3.1 Members shall not misrepresent, either directly or indirectly, their skills, training, professional credentials, identity or services.
3.2 Members shall provide only those services for which they are qualified through education or experience and which are allowed by their practice acts and other pertinent regulation.
3.3 Members shall provide services, make referrals, and seek compensation only for those services that are necessary.
3.4 Members shall recognize the need for continuing education and participate in educational activities that enhance their skills and knowledge.

3.5 Members shall educate those whom they supervise in the practice of athletic training about the Code of Ethics and stress the importance of adherence.

3.6 Members who are researchers or educators should maintain and promote ethical conduct in research and educational activities.

**PRINCIPLE 4:**

Members shall not engage in conduct that could be construed as a conflict of interest or that reflects negatively on the profession.

4.1 Members should conduct themselves personally and professionally in a manner that does not compromise their professional responsibilities or the practice of athletic training.

4.2 National Athletic Trainers’ Association current or past volunteer leaders shall not use the NATA logo in the endorsement of products or services or exploit their affiliation with the NATA in a manner that reflects badly upon the profession.

4.3 Members shall not place financial gain above the patient’s welfare and shall not participate in any arrangement that exploits the patient.

4.4 Members shall not, through direct or indirect means, use information obtained in the course of the practice of athletic training to try to influence the score or outcome of an athletic event, or attempt to induce financial gain through gambling.

**UMU ATP CODE OF ETHICS**

In addition to the NATA Code of Ethics, the following standards apply to those involved with the University of Mount Union Athletic Training Program. Failure to abide by these standards can lead to permanent expulsion from the program.

1. Be honest with yourself and your ability. Admit if you lack the knowledge or skill, and do not attempt to bluff your way through.

2. Under no circumstance should you attempt to carry out a procedure or evaluate an injury/illness unless you have the knowledge and proficiency mastered.

3. Altering, copying, sharing, removing, or tampering with medical records is not tolerated and is a violation of the law.

4. Medical confidentiality is to be strictly maintained. Be wary of your surroundings when discussing an injury/illness, and be mindful when working on medical records. Colleagues and teammates do NOT have a right to know other’s conditions; furthermore, it is illegal.

5. Use good judgment when discussing the events of the day, practice, occurrences in the athletic training facility, etc. Even though they may not be medical in nature, much of what you experience here is not for public knowledge.

6. Encourage and promote scholarship achievement in others. Strictly adhere to the Academic Integrity policies of UMU.

7. Use of non-therapeutic drugs for any purpose is not condoned.

8. Negative actions in or outside of the ATP may have a profound effect on your continuing in the program, especially if they affect patient safety or trust in you.

9. Be professional at all times while representing UMU. Your dress, your mannerisms, attitude, integrity, and character should reflect positively on the UMU ATP, while at home and away.

10. Unless given permission by your Preceptor, you are to strictly adhere to team rules while traveling. You are not to be in athlete’s or coach’s rooms after curfew, nor are they allowed to be in your room.

11. Be cooperative, courteous, and considerate to staff, coaches, colleagues, student athletes, and visitors. Represent our program and the medical profession accordingly.

12. Avoid rude behavior, inappropriate language, discriminatory remarks or behaviors, and criticism of others.

13. Adhere to the Honor code - do not lie, steal, or cheat.

14. You are to show respect for the Preceptors affiliated with the UMU ATP. Any comments or actions interpreted as being disrespectful will not be tolerated.

15. Always be early, prepared, and professional.

Reference: ECU ATS Handbook 2007, Dr. Katie Walsh PD 66

At matriculation into the UMU ATP, students will be expected to sign agreement to comply with the NATA and UMU ATP Code of Ethics (Appendix A) and the Confidentiality of Patient Health Information and Affidavit (Appendix B). Failure to uphold the NATA or UMU ATP Code of Ethics may result in disciplinary action.
I. Pursuant to the program mission, the Mount Union faculty and staff has designed and approved an education program which is well planned and intensive. To remain appropriate for the level of competence required by entry-level athletic training professionals into the twenty-first century, all aspects of the program will be re-evaluated regularly to ensure compliance.

II. In order to prepare athletic trainers who will be compassionate, effective healthcare professionals in a changing world, with emerging national and state standards of practice, the Mount Union ATP shall provide didactic and clinical learning opportunities necessary for students to:

1. Recognize that their patients are spiritual beings whose needs transcend their physical complaints;
2. Understand the historical context of the discipline and its place in the health care system;
3. Possess a personal philosophy consistent with the values required to improve health care in general and the profession of athletic training in particular and that places the patient’s needs at the center of their world views.
4. Become proficient in the knowledge and application of the educational competencies and clinical proficiencies as enumerated by the Standards and Guidelines for the Athletic Trainer issued by the CAATE;
5. Develop specified technical skills and knowledge through well supervised hands-on application in a variety of athletic training settings, including but not limited to interscholastic, intercollegiate and professional athletics and appropriate allied medical settings;
6. Obtain formal classroom and laboratory instruction with regard to knowledge and skills specific to the entry-level athletic trainer, as well as base-line exposure to the associated sub-disciplines within athletic training, sport and exercise sciences.
7. As a result of their exposure to and participation in the didactic and clinical education program, each student shall be prepared to practice the profession of Athletic Training by utilizing the skills obtained through effective learning of the cognitive, affective and psychomotor domains:

A. **Prevention** of athletic injuries and illnesses; Students will be able to identify injury and illness risk factors associated with participation in competitive athletics and will be able to plan and implement all components of a comprehensive athletic injury and illness prevention program;

B. **Clinical evaluation and diagnosis** of athletic injuries and illnesses; Students will be able to conduct a thorough initial clinical evaluation of injuries and illnesses commonly sustained by the competitive athlete. Students will be able to formulate an impression of the injury or illness for the primary purposes of administering proper first aid and emergency care and making appropriate referrals to physicians for diagnosis and medical treatment;

C. **Immediate care of athletic injuries and illnesses**; Students will be able to provide appropriate first aid and emergency care for acute athletic injuries and illnesses according to accepted standards (American Red Cross, American Heart Association, or equivalent) and refer injured and ill athletes to appropriate medical/paramedical personnel for evaluation and diagnosis and follow-up care;

D. **Treatment, rehabilitation and reconditioning of athletic injuries and illnesses**; The student will be able to plan and implement a comprehensive rehabilitation and reconditioning program for injuries and illness sustained by the competitive athlete;

E. **Organization and administration of athletic health care**; Students will be able to plan, coordinate and supervise all administrative components of an athletic training program including those pertaining to health care services (physical examinations and screening, first aid and emergency care, follow-up care and rehabilitation), financial management, athletic training room management, personnel management and public relations;

F. **Professional responsibility of athletic trainers in providing athletic health care**; Students will be able to interpret the role of the Certified Athletic Trainer as a health care provider, promoting Athletic Training as a professional discipline, and providing instruction in athletic training and sports medicine subject matters;

G. **Written and oral communication**; Students will be able to provide health care information and counseling to athletes, parents, and coaches on matters pertaining to the physical, psychological, and emotional health and well-being of the athlete;
**H  Critical thinking and problem solving:** Students will be able to realize their own personal strengths or weaknesses in the athletic training profession and continue to pursue life-long continuing education;

**I  The appreciation of athletic training as a service-oriented allied health care profession:** Students will be prepared to practice the profession of Athletic Training when working cooperatively with allied health care personnel including but not limited to physicians, physician assistants, chiropractors, physical therapists, occupational therapists, sports psychologists, sports nutritionists, nurses, exercise physiologists and hospital/clinical administrators.

All learning goals will be assessed by an oral practical exam and recorded in the clinical proficiency handbook and electronically recorded using ATrack. **ATrack** is a powerful online database that manages ATP student data. It is one secure place, where faculty and staff can review student proficiency scores, clinical experience hours, forms, documents and the ATP course matrices. Both the handbook and ATrack will be maintained throughout each student’s academic career at Mount Union.

III. The department and program faculty and staff members are committed to maintaining a high standard of academic achievement and clinical skill for graduates of the Athletic Training Program through:

1. Clearly defining, publishing, and supplying directly to the potential athletic training major, the established selection criteria for the ATP;
2. Monitoring the ATP Athletic Training Student (ATS) through established retention standards;
3. Providing quality academic advisement for each student through regular conferences at least once each semester and availability for more informal counseling on an “as needed” or “as requested” basis;
4. Providing quality clinical field experiences through sport assignments with a variety of clinical settings and challenges;
5. Requiring the clinical experience, under the direct supervision of Preceptors and the Medical Director, to involve a minimum of six semesters.
6. Maintaining and surpassing a first-time pass rate on the BOC Examination above the national average.

The objectives of the Mount Union Athletic Training Program support the goals and are consistent with the missions of the Human Performance and Sport Business Department as well as the mission of the Mount Union community at large. It is committed to the continual evaluation and upgrade of the human, financial, and teaching resources necessary to accomplish the goals of the program. The program shall conform to, and wherever possible, exceed the standards set forth by the Commission on Accreditation of Athletic Training Education (CAATE). Additionally, the program standards are consistent with the ethical and professional standards of practice of the National Athletic Trainer’s Association, Inc.

The Human Performance and Sport Business Department and the ATP faculty/staff accept the responsibility for maintaining currency with regard to curricular and course content, and for being proactive as well as reactive with regard to the internal and external standards and criteria, which affect athletic training students. There is an undeniable tradition of excellence in both the athletic training program and the athletic training services offered at Mount Union. There is also a commitment to the growth and improvement of the athletic training profession as a whole.

Three operative credos for the Mount Union ATP, as we travel through the twenty-first century are:

**“Faith, Desire, Effort, and Service”** Daniel M. Gorman, Program Director Emeritus

**“Excellence is never achieved in isolation”** Dr. Robert Watson, Dean of College – 1993

**“Every individual is capable of achieving greatness because every individual is capable of serving”** Martin Luther King, Jr.

The ATP faculty and staff have been and will continue to be committed to these ideals of a teamwork approach to athletic training and the service-to-others component of athletic training. We realize that we cannot provide the finest in athletic training education and service to Mount Union without strong administrative and medical support combined with a strong didactic and clinical education program. The over-riding philosophy from which this program is designed and the motivation which drives its progress is specifically for the students who are the recipients of this education and who are working at the grass roots level of providing these services. We have tremendous pride in our history as a reputable liberal arts institution, as well as for providing a paragon education in the field of athletic training. As an institution and as an education program, we pledge to do what is necessary to continually improve on these ideals.
ACADEMIC PROGRAM

There is a growing demand in the U.S. and throughout the world for Certified Athletic Trainers who specialize in the prevention and care of injuries and illnesses relating to physically active individuals. In response to this demand, the University of Mount Union has developed a program to prepare qualified students for careers in athletic training.

The Athletic Training Program (ATP) is an academic major within the Department of Human Performance and Sport Business. It is among an elite group of programs throughout the USA that are accredited; Mount Union was recently re-accredited by the Commission on Accreditation of Athletic Training Education (CAATE), continuing through the academic year 2019-2020.

Graduates of the program are qualified to challenge the Board of Certification (BOC) examination as well as the state examination for a License to practice Athletic Training in Ohio. Students selected into the ATP serve and learn under the direct supervision of the University Medical Director, the University Team Orthopedic Physician, and faculty and staff Certified/Licensed Athletic Trainers in the prevention, diagnosis, treatment, and rehabilitation of athletic related injuries and illnesses.

Upon graduation at Mount Union, athletic training students will have the fundamentals and training needed to pursue careers in or be accepted into higher education programs for athletic training, strength and conditioning, fitness, therapy and physiology, as well as many other fields associated with athletic training.

UMU ATP ROLE DELINEATION

The UMU ATP Faculty and staff consist of the Head Team Physician, Health Center Physician(s), Orthopedics and staff, ATP PD, Head Athletic Trainer, Certified Athletic Trainers, and athletic training students.

Medical care for the student athlete will be coordinated, primarily, by the Head Team Physician and Certified Athletic Trainers assigned to each of the sports. The ATP PD and Certified Athletic Trainers work under the direction of the Head Team Physician, Health Center Physicians, and any other related medical physician specialist.

Preceptors are responsible for the supervision of the athletic training students in all clinical rotations.

ATP Program Director

The ATP PD is responsible for the administration and enforcement of all academic and clinical policies and procedures, as well as providing continued development and promotion of the Athletic Training Program and Clinical Athletic Training Services providing as a part of the overall Program.

Clinical Education Coordinator

The CEC will work report to the ATP PD. The CEC is responsible for the administration of the clinical education component of the ATP. The CEC will work closely with the ATP via on-site supervision of athletic training students to ensure compliance with all CAATE standards involving the clinical education requirements of the ATP.

Faculty Athletic Trainers

The Faculty Athletic Trainers serve as the certified athletic trainers for all intercollegiate teams. They are responsible for the prevention, care, and rehabilitation of athletic injuries, as well as assisting in the clinical supervision of athletic training students and the teaching.

Head Athletic Trainer

The Head AT will work and report to the ATP PD. The Head AT is responsible for the organization and administration of the Clinical Athletic Training Services provided to the student athletes of the University. The Head AT will ensure compliance with all allied-health care rules and regulations relevant to a medical facility while providing an environment conducive to student interaction and learning.

Intern Athletic Trainers

The intern athletic trainers serve as the certified athletic trainers for all intercollegiate teams. They are responsible for the prevention, care, and rehabilitation of athletic injuries, as well as assisting in the clinical supervision of athletic training students. The intern athletic trainers will work and report to the Head Athletic Trainer and ATP PD.
Staff Athletic Trainers
The staff athletic trainers serve as the certified athletic trainers for all intercollegiate teams. They are responsible for the prevention, care, and rehabilitation of athletic injuries, as well as assisting in the clinical supervision of athletic training students. The staff athletic trainers will work and report to the Head Athletic Trainer and ATP PD.

ACCREDITATION STATUS
The University of Mount Union has developed the athletic training major to prepare qualified students for careers in athletic training. Since 1987, the major has met the National Athletic Trainer’s Association Professional Education Committee (NATAPEC) standards as an Approved Undergraduate Athletic Training Program. In 1998, it earned accreditation through the Commission on Accreditation of Allied Health Education Programs (CAAHEP). In July 2006, the accreditation process changed to the Commission on Accreditation of Athletic Training Education (CAATE) in which the UMU ATP was fully accredited. The UMU ATP is currently accredited under a 10-year accreditation through the year 2020.

ADMISSION REQUIREMENTS
Entrance into the accredited athletic training major is by selective admission.
A formal application process shall be initiated at the end of the pre-professional, Level 1 Student year, the year in which the student is a candidate for the athletic training major (typically the freshman year) and after successful completion of the following prerequisites:

1. Academic Requirements
   A minimum grade of C must be achieved in each of the following courses:
   - ATP 115 Foundations of Athletic Training
   - ATP 116 Orthopedic Applications in Athletic Training
   - ATP 118 Medical Terminology and Health
   - BIO 210 Anatomy & Physiology I
   - BIO 211 Anatomy & Physiology II
   - Three supportive letters of recommendation; (two must be from off campus professionals)
   - Written application and resume
   - Written examination (minimum score: 73 percent);
   - Oral/practical examination (minimum score: 73 percent);
   - Cumulative GPA of at least a 2.5 at the time of application;
   - Average Preceptor evaluation score of at least 73 percent;
   - Formal interview with all Athletic Training Faculty and Staff
   - Meet all technical standards established for the program and the profession of athletic training. (See ATP Student Handbook for the complete policy on technical standards page or on the UMU ATP website: http://www.mountunion.edu/athletic-training-major.)

   Additionally, as a part of the matriculation process, all students admitted to the program must complete formal OSHA training (which includes obtaining or declining the hepatitis B vaccination), purchase student liability insurance and successfully complete a medical examination.

   These are minimum requirements for admittance. Competitive selection criteria will be employed if/when there are more qualified candidates than available positions. Each year a maximum of 16 candidates are matriculated into the ATP. A re-application process is available if a student is unsuccessful on the initial application to the program. It is the policy of the Mount Union ATP not to discriminate on the basis of race, gender, religion, age, color, creed, national or ethnic origin, marital or parental status, or disability in the selection of students into the Athletic Training Program.

2. Clinical Directed Observation Requirements
   ATP Candidates will be required to complete fifty clinical athletic training hours per semester for a total of 100 hours for admittance into the UMU ATP. Fifty hours per semester are required for a total of 100 hours for admittance into the UMU ATP. The scheduling of the pre-professional level I student will be directly supervised by the UMU Clinical Education Coordinator. The pre-professional level I student will work six hours biweekly plus any game
observation time. During the fall semester each pre-professional level I student will have to observe hours with fall sports, such as football, soccer, volleyball, cross-country/track, etc. Additional opportunities will be available with fall lacrosse, fall baseball, fall softball, basketball, wrestling, indoor track, swimming, and ATF/Rehab. The spring semester will consist of hours spent with basketball, outdoor track, baseball, softball, lacrosse, wrestling, and spring football. All students will observe hours with at least seven different sports teams during their pre-professional level I year.

**Directed Observation (DO):** Directed Observation is an essential part of the selection process and requires a great deal of time commitment on behalf of the applicant. The word “Directed” implies that students applying to the program will receive direction from the preceptors and students in the ATP. Students taking a proactive approach (i.e., asking questions, offering assistance during day-to-day activities, seeking additional assignment hours, etc.) will undoubtedly have a stronger application than those who do not. Essentially, it is during the directed observation period where the preceptors and ATS have an opportunity to interact with candidates on a one-on-one basis, and the candidates have an opportunity to determine whether or not athletic training truly fits their career goals.

*General Hours Requirement:* Each candidate shall document at least 50 clock-hours of Directed Observation in the athletic training room and/or in a medical/allied health facility by the end of their pre-professional year. Generally, these clock-hours will be divided equally between the Fall and Spring semesters. Within these hours, students will learn the day-to-day operations of the facility and observe a variety of professional practices of a variety of health care professionals. Time in DO may also be utilized to practice skills acquired from athletic training coursework.

**PROGRAM FEES**
As a part of the matriculation process, all students admitted to the program must:

- complete formal OSHA training (which includes obtaining or declining the hepatitis B vaccination at no charge to the student);
- purchase student liability insurance (approximately $15-30 annually);
- complete the Professional Rescuer CPR/AED certification (approximately $15 annually);
- successfully complete a medical pre-participation examination (cost incurred by student);
- Lab fees may be assessed for the following courses
  - ATP 116  $50
  - ATP 230  $60
  - ATP 232  $75
  - ATP 350  $75
  - ATP 450  $75

**COMPETITIVE REQUIREMENTS/Criteria**
One of the essential goals of Mount Union’s ATP is to prepare students to successfully challenge the BOC examination upon graduation. To achieve this goal and provide a quality education, Mount Union’s ATP strives to maintain an 8:1 ATS to PRECEPTOR ratio. Given this limitation of numbers, it is sometimes not possible to accommodate all qualified student candidates into the ATP. Competitive selection criteria will be employed when there are more qualified candidates than available positions. As such, the following criteria are used on a competitive basis to select candidates. Each category is worth a maximum of twenty points. A percentage of twenty points will be calculated, based upon the performance of each Level 1 Student candidate, in each category, adding up to a total of one-hundred possible points. The top total scores will determine those candidates who will be offered a position in the ATP.

1. Cumulative GPA.
2. Professional GPA.
4. Performance on the comprehensive written examination.
5. Performance on the oral practical examination.
TRANSFER STUDENTS
Students transferring from other institutions are encouraged to apply to the ATP. Once accepted to the University, a transcript analysis will be made by the UMU Registrar in conjunction with the UMU ATP Director to determine acceptable transfer credit. Athletic training core courses are generally NOT accepted from other institutions unless all educational competencies from the originating institution can be precisely matched to the UMU course(s) in question. To be eligible for admission, transfer students must meet all of the pre-requisite requirements described above. Directed Observation (DO) clock-hours obtained at locations other than this institution may be accepted on the discretion of the ATP PD and counted towards the admission requirements.

APPEALS and/or RE-APPLICATION PROCESS
Should an eligible student not be selected for admission to the ATP, he/she may appeal that decision to the ATP Selection Committee. Such appeal should be requested in writing to the selection committee no later than two weeks after the deferment letter has been received. The decision of the committee with regard to admission to the program will be final. Eligible and/or ineligible students may re-apply the following semester and/or year. A student may re-apply two times to the UMU ATP with the understanding that it may take longer than the average four years to graduate.

ATP RETENTION
The ATP Program Director is charged with handling all issues associated with progression, retention, probation, and dismissal of ATS. This is further explained in the UMU ATP disciplinary policy found on page 25 in the UMU ATP Handbook. The ATP PD, Faculty, and Staff will also serve as a source to help guide and direct the program towards fulfillment of its mission and goals. In the event of a discretionary case, the ATP committee, made up of all ATP faculty and staff will convene to discuss the pertinent issues involved.

ATP PROGRESSION
In order to be automatically retained and progressed in the ATP each semester all ATS must:
- Make normal academic progress towards graduation
- Maintain a cumulative GPA of at least 2.50
- Complete all required ATP courses with a grade of “C” or higher
- Observe and practice all policies and procedures of the ATP
- Maintain Current OSHA Training
- Maintain current certification in First-Aid and CPR for the Professional Rescuer (or equivalent)
- Uphold the University of Mount Union Technical Standards, found on page 9 of the UMU ATP Handbook
- Attend Monthly Mandatory ATP Meetings unless excused by the ATP PD
- Display strong personal qualities and demonstrate appropriate behavior and maturity on campus as well as within the community such that the ATP and the University are well represented

PROBATION CRITERIA
Should a student fail to meet any of the criteria listed above, he/she will be notified, in writing, about being placed on probation. Students placed on probation will be given specific conditions, which must be met to remove their probationary status. An ATS on probation will be given one semester to rectify any deficiencies. Students who incur more than one cause for probation in the same semester OR who incur an additional violation while on probation may be recommended for disenrollment from the ATP.

DISENROLLMENT CRITERIA
Should a student blatantly violate any ATP policy or procedure, the Code of Conduct Agreement, or any of the above progression criteria, he/she may be called before the ATP Disciplinary Board for potential disenrollment from the ATP. Any ATS placed on probation that fails to meet the conditions set forth by the probation notification may also be called before the ATP Disciplinary Board for potential disenrollment.

Policy Appeals: Students may appeal decisions if they feel they are not being treated fairly.
Appeals of decisions should be made in the following order:
1) ATP Director
2) Disciplinary Committee
3) Department Chair
4) Dean of Professional Studies
5) Dean of the University

NOTE: Dismissal from the Athletic Training Program does not automatically lead to dismissal from UMU.

TECHNICAL STANDARDS

ATP Candidates must meet all Technical Standards established for the ATP and the profession of athletic training in order to participate in the UMU ATP.

The Athletic Training Program at MOUNT UNION is a rigorous and intense program that places specific requirements and demands on the students enrolled in the program.

According to the National Athletic Trainers’ Association Education Council,

“an athletic trainer is a qualified health care professional educated and experienced in the management of health care problems associated with physical activity. In cooperation with physicians and other health care personnel, the athletic trainer functions as an integral member of the health care team in secondary schools, colleges and universities, professional sports programs, sports medicine clinics, and other health care settings. The athletic trainer functions in cooperation with medical personnel, athletic personnel, individuals involved in physical activity, parents, and guardians in the development and coordination of efficient and responsive athletic health care delivery systems.

The athletic trainer’s professional preparation is directed toward the development of specified competencies in the following domains: risk management and injury prevention, pathology of injuries and illnesses, orthopedic clinical examination and diagnosis, medical conditions and disabilities, acute care of injury and illness, pharmacology, therapeutic modalities, conditioning and rehabilitative exercise, nutritional aspects of injury and illness, psychosocial intervention and referral, health care administration, professional development and responsibilities. Through a combination of formal classroom instruction and clinical experience, the athletic trainer is prepared to apply a wide variety of specific health care skills and knowledge within each of the domains”.

Becoming a Certified Athletic Trainer requires the completion of a professional education program that is both intellectually and physically challenging. The purpose of this document is to articulate the demands of this program in a way that will allow students applying for admission into the program to compare their own capabilities against these demands. The Mount Union Athletic Training Program acknowledges the requirements outlined in Section 504 of the 1973 Vocational Rehabilitation Act and PL 103-336, the American Disabilities Act (ADA) of 1990.

All applicants to Mount Union’s Athletic Training Program must meet technical and academic standards for admission, as outlined in this statement. If a student believes that a disability has had an impact on the student’s grades, course choice or standardized admission test scores, the student may request consideration of this in the admissions process. Documentation of the disability should be submitted with the application for admission to The Office of Student Academic Services under a separate cover directly to the Director of Student Accessibility Services, who determines eligibility for reasonable accommodations.

An objective of this program is to prepare graduates to enter a variety of employment settings and to render health care to a wide spectrum of individuals engaged in physical activity. The technical standards set forth by the Athletic Training Program establish the essential qualities considered necessary for students admitted to this program to potentially achieve the knowledge, skills, and clinical competencies of an entry-level athletic trainer, as well as to potentially meet the expectations of
the program’s accrediting agency, the Commission on Accreditation of Athletic Training Education (CAATE). The following abilities and expectations must be met by all students admitted to the Athletic Training Educational Program.

NOTE: Compliance with the program’s technical standards does not guarantee a student’s eligibility for matriculation into the Accredited Athletic Training Program and/or for the Athletic Trainer’s Board of Certification (BOC) exam.

Applicants who are offered a position in the Athletic Training Program (ATP) will be asked to certify their ability to complete the essential tasks, with or without reasonable accommodations associated with performance as an athletic training student. Reasonable accommodations refer to ways in which Mount Union may assist students with disabilities to accomplish the essential tasks.

Reasonable accommodation does not mean that students with disabilities will be exempt from certain tasks; it does mean that the athletic training faculty and staff in coordination with Student Accessibility Services, will work with students with disabilities to determine reasonable accommodations to assist the student towards completion of the Program’s essential tasks.

After acceptance into the program, a student with a disability who seeks to obtain reasonable accommodations must make a formal request to the Program Director of the Athletic Training Program, Director of Student Accessibility Services and must be prepared to provide WRITTEN documentation substantiating the claim of the student’s disability. A student may be administratively withdrawn, or not admitted if it becomes apparent that the student cannot complete essential tasks even with accommodation, if the accommodations needed are not reasonable and would cause undue hardship to Mount Union, or if fulfilling the functions would create a significant risk of harm to the health and/or safety of others.

Students who have questions about this document or who would like to discuss specific accommodations should make an inquiry with the Program Director of the Athletic Training Program and the Director of Student Accessibility Services.

Essential Tasks
1. Students must have the mental capacity to assimilate, analyze, synthesize, integrate concepts and problem solve to formulate assessment and therapeutic judgments and be able to distinguish deviations from the norm within the constraints of applicable national, state laws and/or accreditation standards governing the legal limits of authority of athletic training students;
   - Students must meet class standards for course completion throughout the curriculum;
   - Students must complete readings, assignments and other activities outside of class hours;
   - Students must be able to gather decision-making pieces of information during an injury/illness assessment activity in class or in the clinical setting without the use of an intermediary such as a classmate or preceptor;
   - Students must apply critical thinking processes to their work in the classroom and in the clinical setting, and must exercise sound judgment in the class and in the clinical setting and must follow safety procedures established for each class and clinical setting;
   - Any documentation written by an athletic training student must be countersigned by the supervising preceptor.
   - Documentation written by an athletic training student must be followed by a title, which indicates that he/she is a student.

2. Students must demonstrate sufficient postural and neuromuscular control, ambulatory function, sensory function, and coordination to perform appropriate physical examinations using accepted techniques; and accurately, safely and efficiently use equipment and materials during the assessment, treatment and rehabilitation of patients, including, but not limited to the following:
   - Students must perform treatment and rehabilitation activities in class or in the clinical setting by direct performance or by instruction and supervision of intermediaries;
   - Students typically sit for 2-10 hours daily in the classroom, stand for 1-4 hours at indoor and outdoor practices/contests and must be able to ambulate at least 20 yards at approximately 2.5 miles per hour indoor and/or outdoor, possibly over rough terrain;
   - Students frequently lift ten pounds or less and occasionally lift more than ten pounds overhead, i.e., ice coolers, water bottle caddies, first-aid kits.
   - Students frequently carry up to 25-35 pounds while walking up to one-hundred feet, possibly over rough terrain and/or up and down stairs;
• Students frequently exert at least 25 pounds of push-pull forces to objects up to 50 feet.
• Students frequently twist, turn, bend, stoop and kneel on the floor up to 15 minutes;
• Students frequently move from place to place and position to position and must do so at a speed that permits safe handling of equipment, classmates and/or injured athletes;
• Students frequently stand and walk while providing support and/or ambulatory assistance to classmates and/or injured athletes;
• Students frequently coordinate verbal and manual activities with gross motor activities;
• Students frequently use verbal, auditory, tactile, and visual senses to give and/or receive classroom and/or clinical setting instruction and to evaluate and treat injured athletes;
• Students often work within an electrical field;
• Students often will need to have, corrected or uncorrected, 20/40 vision to correctly see activities across the field, court or mat;
• Students frequently need basic neurological function to perceive hot, cold, change in contour of surface/body part and to maintain 10 pounds of grip strength for one minute or longer;
• Students frequently need bladder, bowel, emotional control for 2-3 hours;

3. Students must possess the ability to communicate effectively and sensitively with patients and colleagues, including individuals from different cultural and social backgrounds; this includes, but is not limited to, the ability to establish rapport with patients and communicate medical judgments, diagnostic and treatment information effectively. Students must be able to understand, read, write and speak the English language at a level consistent with successful course completion and competent professional clinical practice;
• Students frequently require the ability to record the physical examination results and a treatment plan clearly and accurately;
• Students need to possess the ability to understand and/or make and execute quick, appropriate and accurate decisions, sometimes in a stressful environment while maintaining composure and continuing to function effectively;

4. Students must display the perseverance, diligence and commitment to complete the athletic training education program as outlined and sequenced;
5. Students must have or develop the flexibility and the ability to adjust to changing situations and uncertainty in clinical situations;
6. Students must have or develop affective skills and appropriate poise, demeanor and professionalism that relate to athletic training education and quality patient care.
• Students must maintain a neat personal appearance and hygiene appropriate to the classroom and clinical setting;

7. Students must annually pass a cardiopulmonary resuscitation course at the health professional level;
8. Students must annually complete OSHA-regulated Blood borne Pathogen Exposure training and complete the Hepatitis B Vaccine series or have a written declination form on file.
9. Students must have or develop the capacity to maintain composure and continue to function well during periods of high stress;

Technical Standard Assessment
1. Students must have the mental capacity to assimilate, analyze, synthesize, integrate concepts and problem solve to formulate assessment and therapeutic judgments and to be able to distinguish deviations from the norm within the constraints of applicable national, state laws and/or accreditation standards governing the legal limits of authority of athletic training students;
   STANDARD ASSESSMENT:
   • Meet all academic criteria for ATP selective admission eligibility as delineated in the Mount Union Catalog and Athletic Training Student Handbook.
   • Students will be advised of and tested on their knowledge of the legal limits that define the role of an athletic training student.
• Students must meet class standards for course completion throughout the curriculum;
  A: Students are advised of Program Retention Criteria.
• Students must complete readings, assignments and other activities outside of class hours;
  A: assessed by grading homework assignments.
• Students must be able to gather decision-making pieces of information during an injury/illness assessment activity in class or in the clinical setting without the use of an intermediary such as a classmate or preceptor;
  A: This standard will be formally assessed during supervised clinical education as well as during supervised clinical field experiences.
• Students must apply critical thinking processes to their work in the classroom and in the clinical setting, and must exercise sound judgment in the class and in the clinical setting and must follow safety procedures established for each class and clinical setting;
  A: This standard will be formally assessed during supervised clinical education as well as during supervised clinical field experiences.
  A: Students are informed that experiences NOT supervised by an approved Preceptor WILL NOT COUNT toward the required traditional athletic training field experience.
• Any documentation written by an ATS must be countersigned by the supervising preceptor. Documentation written by an athletic training student must be followed by a title, which indicates that he/she is a student.
  A: This standard is assessed in didactic courses as well as during clinical education.

2. Sufficient postural and neuromuscular control, ambulatory function, sensory function, and coordination to perform appropriate physical examinations using accepted techniques; and accurately, safely and efficiently use equipment and materials during the assessment, treatment and rehabilitation of patients; including, but not limited to the following:
• Students must perform treatment and rehabilitation activities in class or in the clinical setting by direct performance or by instruction and supervision of intermediaries;
  A: Assessed in didactic classes, clinical education and field experience. Documentation is achieved on clinical proficiency skill-sheets after initial exposure to each skill has been accomplished, subsequent practice trials and finally after each skill has been mastered by the student.
• Students typically sit for 2-5 hours daily in the classroom, stand for 1-4 hours during indoor and outdoor practices/contests and must be able to ambulate at least 20 yards at approximately 2.5 miles per hour indoor and/or outdoor, possibly over rough terrain;
  A: Assessed in didactic classes, clinical education and field experiences.
• Students frequently lift ten pounds or less and occasionally lift more than ten pounds overhead, i.e., ice coolers, water bottle caddies, first-aid kits.
  A: Assessed during field experience directed observation when candidates for the program work with various sport teams.
• Students frequently carry up to 25-35 pounds while walking up to one-hundred feet, possibly over rough terrain and/or up and down stairs;
  A: Assessed during clinical experience directed observation when candidates for the program work with various sport teams.
• Students frequently exert at least 25 pounds of push-pull forces to objects up to 50 feet.
  A: Assessed during clinical experience directed observation when candidates for the program work with various sport teams.
• Students frequently twist, turn, bend, stoop and kneel on the floor up to 15 minutes;
  A: Assessed during clinical experience directed observation when candidates for the program work with various sport teams.
• Students frequently move from place to place and position to position and must do so at a speed that permits safe handling of equipment, classmates and/or injured athletes;
  A: Assessed during clinical experience directed observation when candidates for the program work with various sport teams.
• Students frequently stand and walk while providing support and/or ambulatory assistance to classmates and/or injured athletes.
  A: Assessed during clinical experience directed observation when candidates for the program work with various sport teams.
• Students frequently coordinate verbal and manual activities with gross motor activities;
  A: Assessed during clinical experience directed observation when candidates for the program work with various sport teams.
• Students frequently use verbal, auditory, tactile, and visual senses to give and/or receive classroom and/or clinical setting instruction and to evaluate and treat injured athletes;
  A: Assessed in didactic classes, clinical education and field experiences.
Students often work within an electrical field;
A: Taught, practiced, supervised and assessed in classroom, clinical education and field experience.

Students often will need to have, corrected or uncorrected, 20/40 vision to correctly see activities across the field, court or mat;
A: Documented on pre-matriculation physical exam.

Students frequently need basic neurological function to perceive hot, cold, change in contour of surface/body part and to maintain 10 pounds of grip strength for one minute or longer;
A: Assessed in didactic classes, clinical education and field experiences.

Students frequently need bladder, bowel, emotional control for 2-3 hours;
A: Assessed during clinical experience directed observation when candidates for the program work with various sport teams.

STANDARD ASSESSMENT:
• Successful completion of the psychomotor aspects of the selective admission eligibility criteria including 1) the achievement of at least a 73% score on the ATP 116 oral/practical final examination and 2) successful completion of all ATP 116 clinical proficiencies. Both assessment tools require the candidate to perform prophylactic and therapeutic taping, wrapping, special pad fabrication, lifting equipment, crutch use and various patient assessment and rehabilitation skills.

3. Students must possess the ability to communicate effectively and sensitively with patients and colleagues, including individuals from different cultural and social backgrounds; this includes, but is not limited to, the ability to establish rapport with patients and communicate medical judgments, diagnostic and treatment information effectively. Students must be able to understand and speak the English language at a level consistent with competent professional practice;
• Students frequently require the ability to record the physical examination results and a treatment plan clearly and accurately;
A: Assessed in didactic classes, clinical education and clinical experiences.

STANDARD ASSESSMENT:
• Assessed ATP 116 Orthopedic Applications in AT. Students will be assessed on their ability to correctly record the information, using standard medical SOAP/HOPS format, provided by an injury scenario.
• Students need to possess the ability to understand and/or make and execute quick, appropriate and accurate decisions, sometimes in a stressful environment while maintaining composure and continuing to function effectively;

STANDARD ASSESSMENT:
• Subjectively assessed during required directed observation hours in the athletic training facility as well as during team observation assignments (the Athletic Training Student Evaluations of ATP Candidates form and the Athletic Training Preceptor Evaluation of ATP Candidates are used to help identify potential communication problems).
• Regarding foreign students, each student must meet established admissions standards for English speaking ability that are used for matriculation into Mount Union.

4. Students must display the perseverance, diligence and commitment to complete the athletic training program as outlined and sequenced;
STANDARD ASSESSMENT:
• The exposure to and the potential for being able to successfully manage the time-intensive demands of the athletic training profession is assessed by each candidate’s completion of the directed observation component of the ATP candidates Pre-Admission Program (see ATS Handbook for specific directed observation requirements).
• This issue is also addressed during formal classroom and informal discussions. Additionally, candidates are formally asked to address the time-intensive nature of the profession and their commitment to the profession as well as long term goals in their letter of application. They are also prompted to address their planned approach on how to manage the time-intensive issue during both their undergraduate years as well as beyond graduation.

5. Students must have or develop flexibility and the ability to adjust to changing situations and uncertainty in clinical situations;
STANDARD ASSESSMENT:
• Again, the exposure to and the potential for being able to handle the time-intensive demands as well as the changing nature and uncertainty of clinical situations of the athletic training profession is assessed by virtue of each candidate’s completion of or failure to complete the directed observation requirements of the program candidate Pre-Admission Program.
• Program candidates are not permitted to provide patient care; therefore, their capacity to demonstrate the ability to adjust to changing situations and uncertainty in clinical situations cannot be fully assessed, especially during periods of high stress involving acute injury assessment. However, through the directed observation requirement, ATP Candidates are able to observe this phenomenon and gain an appreciation of what will be expected of them once accepted into the Program. Also, during the team observation requirement, which is a 20 hour commitment for one week, they are more likely to experience the changing nature of the profession.

6. Students must have or develop affective skills and appropriate poise, demeanor and professionalism that relate to athletic training and quality patient care.

STANDARD ASSESSMENT:

• Program candidates are not permitted to provide patient care; therefore, their capacity to fully demonstrate their affective skills and appropriate demeanor plus the rapport that relates to professional education and quality patient care in clinical situations is limited. However, through the directed observation requirement, ATP candidates are encouraged to interact with student-athletes as well as with athletic training students to gain an appreciation of what will be expected of them once accepted into the ATP. The Athletic Training Student (ATS) Evaluation of Candidate form and the Preceptor Evaluation of ATP Candidate form both provide opportunity for comments in this area.

• Students must maintain a neat personal appearance and hygiene appropriate to the classroom and clinical setting;
  A: Assessed through daily adherence to the established dress code. (ATS Handbook)

7. Students must annually pass the American Red Cross CPR/AED for the Professional Rescuer course.
  A: Assessed by documentation of annual re-training.

8. Students must annually complete OSHA-regulated Blood borne Pathogen Exposure training and complete the Hepatitis B Vaccine series or have a written declination form on file.
  A: Assessed by documentation of annual re-training.

9. Students must have or develop the capacity to maintain composure and continue to function well during periods of high stress;

STANDARD ASSESSMENT:

• Program candidates are not permitted to provide patient care; therefore, their capacity to maintain composure and continue to function well during periods of high stress involving injury assessment cannot be assessed. However, during very stressful oral/practical mock injury examination conditions (ATP 115 and ATP 116 oral/practical examinations), ATP candidates must perform with a minimum level of proficiency as detailed in the Admissions Procedures found in the Mount Union catalog and the Athletic Training Student Handbook.

REQUIREMENTS FOR HONORS IN ATHLETIC TRAINING

To receive departmental honors in athletic training, a student must meet all criteria for graduating with honors in a major. Additionally, the student must complete an in-depth project in one of the content areas described in the BOC Role Delineation Study for Professional Practice of Athletic Trainers for a total of 4 semester hours and the completion of ATP 494.
COURSE DESCRIPTIONS:

ATP 115 Foundations of Athletic Training. An introduction to the multifaceted field of sports medicine, specifically, athletic training; includes the roles and responsibilities of various members of the global sports medicine team, basic components of a comprehensive athletic injury/illness prevention program (including the pre-participation physical examination), physical conditioning, sports nutrition and environmental risk factors. The course also includes introduction to the injury/illness assessment process, including general injury classifications, medical-legal considerations, medical terminology and patient documentation skills. Students seeking admittance into the CAATE accredited athletic training education major must take this course. Four class hours per week, should be taken concurrently with BIO 210. 4 Semester Hours. (typically offered fall semester)

ATP 116 Orthopedic Applications in Athletic Training. This clinical education course has a workshop-type structure. Its purpose is to provide students with the anatomical basis and the technical aspects of applying clinical proficiencies (skills) relating to orthopedic applications used by certified athletic trainers in the care and prevention of injuries relating to physically active individuals, including supportive taping, protective wrapping, special pad fabrication and other applications. The class meets for two hours per week (lab fee required). Prerequisite: ATP 115. 2 Sem. Hrs. (typically offered spring semester)

ATP 118 Medical Terminology and Health. An introduction to medical word structures, with emphasis on word roots, prefixes, suffixes, and abbreviations while gaining an understanding of the rules for building and analyzing medical terms associated with body systems. Students will define and interpret terms relating to structure and function, pathology, diagnosis, and clinical procedures. The course also includes investigation of personal health and wellness and discusses various influencing factors like community health operations, addictive behaviors, and motivation. Prerequisite: BIO 210 4 Sem. Hrs.

ATP 197 Immediate Care of Athletic Injuries. A clinical education course to prepare students to demonstrate knowledge of the practice of athletic training, to think critically about the practices involved in athletic training (including the ability to integrate knowledge, skill and behavior) and to assume professional responsibility; the entry-level certified athletic trainer must recognize, assess and treat patients with acute injuries and illnesses and provide appropriate medical referral. This course will include the initial exposure to selected educational competencies and clinical proficiencies focusing on emergency medical procedures (spine-board, splinting, environmental illness, shock, etc.). Ninety minutes per week. Prerequisite: ATP 116; required and available only for matriculated athletic training majors or by permission of the athletic training program director. 2 Sem. Hrs. (typically offered fall semester)

ATP 216 Injury Recognition I. Clinical assessment of injuries and illnesses commonly sustained by the competitive athlete and/or physically active individual(s). Prepares students to recognize clinical signs and symptoms in order to effectively formulate clinical impressions about the nature and severity of injuries/illnesses relating to the face, head (intercranium), cervical/thoracic spine, shoulder, elbow, wrist and hand for the primary purpose of making an accurate assessment and appropriate medical referrals. The course involves extensive application of anatomy, injury mechanics and an in-depth understanding of injury pathophysiology. Four semester hours plus 75 minutes of lab/workshop per week. Prerequisites: ATP 115, ATP 116, ATP 118 and BIO 210/211. 4 Sem. Hrs. (typically offered fall semester)

ATP 217 Injury Recognition II. The continuation of ATP 216; clinical evaluation of injuries and illnesses commonly sustained by the competitive athlete and/or physically active individual(s). Prepares students to formulate a clinical impression of the nature and severity of injuries/illnesses relating to the thoracic spine, thorax, lumbar spine, abdomen, pelvis, hip, thigh, knee, ankle and foot for the primary purpose of making an accurate assessment and appropriate medical referrals. Four semester hours and 75 minutes of lab/workshop per week. Prerequisite: ATP 216. 4 Sem Hrs. (typically offered spring semester)
ATP 230  Clinical Practicum I. This course is a clinical field experience designed to expose first semester athletic training students to real-life situations relating to the evaluation and care of athletic injuries/illnesses that may occur in an interscholastic or intercollegiate setting within the context of professionally supervised, hands-on patient care. The course requires attendance at all team practices, home contests and selected supervised travel to away contests for the duration of the regular season as assigned by their supervising preceptor. Prerequisite: ATP 115 and ATP 116. This required course is available only for students officially enrolled in the accredited athletic training major (lab fee required). 1 Sem. Hr. (offered every fall)

ATP 232  Clinical Practicum II. This course is a clinical field experience designed to expose second semester athletic training students to real-life situations relating to the evaluation and care of athletic injuries/illnesses that may occur in an interscholastic or intercollegiate setting within the context of professionally supervised, hands-on patient care. The course requires attendance at all team practices, home contests and selected supervised travel to away contests for the duration of the regular season as assigned by their supervising preceptor. Prerequisite: ATP230. This required course is available only for students officially enrolled in the accredited athletic training major (lab fee required). 1 Sem. Hr. (offered every spring)

ATP 291  Therapeutic Rehabilitation and Modalities I. The student will demonstrate the ability to plan, implement, document and evaluate the efficacy of therapeutic modalities and basic components of a comprehensive rehabilitation plan in the treatment of upper quadrant injuries and illnesses of their patients. Basic components of a comprehensive rehabilitation program for the upper quadrant are introduced including anatomical, physiological and psychological basis of a rehabilitation prescription, determination of therapeutic goals, objectives and the need for psycho-social intervention and referral. Major emphasis will be placed upon the physiological response of the body to trauma/injury, pain modulation, infrared modalities, electrical stimulation modalities, therapeutic ultrasound, mechanical modalities, massage and other manual treatment techniques. Other areas of focus will include indications, contraindications, safety precautions, set-up and standard operating procedures of contemporary therapeutic modalities commonly used in athletic therapy. Prerequisite: ATP 115. 4 Sem. Hrs. (typically offered fall semester)

ATP 292  Therapeutic Rehabilitation and Modalities II. A continuation of ATP 291 including basic components of a comprehensive modality and rehabilitation program for the spine and lower quadrant, including anatomical, physiological and psychological basis of a rehabilitation prescription, determination of therapeutic goals, objectives and the need for psycho-social intervention and referral. Students will demonstrate selection and use of various rehabilitation techniques plus the development of criteria for progression to full active participation in lower extremity intensive activities. Selected topics will include range of motion techniques, strengthening, proprioception, aquatic therapy, open and closed kinetic chain exercises and functional progressions. Should be taken concurrently with ATP 217. Prerequisite: ATP 291. 4 Sem. Hrs. (typically offered spring semester)

ATP 316  Medical Aspects of Sport. The pathological basis for clinical presentation of injuries/illnesses commonly sustained by competitive athletes and/or physically active individuals. This course will explore various medical topics relevant for certified athletic trainers. The student will gain an in-depth physician’s and/or allied medical expert’s perspective on selected orthopedic and general medical problems related to physically active individuals and will prepare the student to formulate an impression of an injury/illness for the primary purpose of recognizing the nature and severity of the injury/illness and subsequently formulate an effective treatment plan. Prerequisite: At least level III standing in the athletic training education program or permission of the athletic training program director 4 Sem. Hrs. (typically offered fall semesters)

ATP 350  Clinical Practicum III. This course is a clinical field experience designed to expose third semester athletic training students to real-life situations relating to the evaluation and care of athletic injuries/illnesses that may occur in an interscholastic or intercollegiate setting within the context of professionally supervised, hands-on patient care. The course requires attendance at all team practices, home contests and selected supervised travel to away contests for the duration of the regular season as assigned by their supervising ACI. The didactic portion of the class will focus on athletic injuries that occur commonly in upper extremity sports (baseball, wrestling, softball, swimming). Prerequisite: ATP 216 and ATP 232. This required course is available only for students officially enrolled in the accredited athletic training major (lab fee required). 1 Sem. Hr. (offered every fall)

ATP 355  Clinical Practicum IV. This course is a clinical field experience designed to expose first semester athletic training students to real-life situations relating to the evaluation and care of athletic injuries/illnesses that may occur in an interscholastic or intercollegiate setting within the context of professionally supervised, hands-on patient care. The course requires attendance at all team practices, home contests and selected supervised travel to away contests for the duration of the regular season as assigned by their supervising preceptor. The didactic portion of the class will focus on athletic injuries that occur commonly in lower extremity sports (soccer, basketball, and track). Prerequisite: ATP 217 and ATP 350. This required
course is available only for students officially enrolled in the accredited athletic training major. 1 Sem. Hr. (offered every fall)

ATP 385  **Sport Nutrition and Pharmacology**  This course will provide elementary principles of nutrition and their practical application in sport.  This course will also provide general knowledge of therapeutic drug classifications, indications, contraindications, regulations, and drug testing in sport.  Emphasis will range from drugs used for hypertension, diabetes, epilepsy, asthma, orthopedic problems, and common illnesses.  Students will demonstrate the ability to plan and implement proper sport nutrition.  Students will also demonstrate basic knowledge of common uses of pharmaceutical drugs in the athletic setting.  Prerequisite:  At least level III standing in the athletic training education program or permission of the athletic training program director 4 Sem. Hrs. (typically offered spring semesters)

ATP 394  **Cultural Competencies in Health Care.**  The objective of this course is facilitating student learning with regard to building cultural awareness in the health care setting.  Students will learn culturally-based theories and models as well as learn the process of cultural competence in the providing health care.  The course offers information on analyzing and assessing one’s own cultural attitudes and behaviors.  The course will also include an off-campus exposure to a culturally diverse setting.  Prerequisite:  Level II Standing in ATP. 2 Sem. Hrs. (typically offered every other spring semester)

ATP 400  **Independent Study (elective).**  The student, in consultation with the instructor, will select a topic, project or problem for in-depth research.  Prerequisite:  A 2.8 GPA in major and at least junior standing. 1-4 Sem. Hrs. (typically offered every semester)

ATP 450  **Clinical Practicum V.**  This course is a clinical field experience designed to expose fifth semester athletic training students to real-life situations relating to the evaluation and care of athletic injuries/illnesses that may occur in an interscholastic or intercollegiate setting within the context of professionally supervised, hands-on patient care.  The course requires attendance at all team practices, home contests and selected supervised travel to away contests for the duration of the regular season as assigned by their supervising preceptor.  The didactic portion of the class will focus on athletic injuries that occur commonly in equipment intensive sports (football and lacrosse).  Prerequisite: ATP 355.  This required course is available only for students officially enrolled in the accredited athletic training major (lab fee required). 1 Sem. Hr. (offered every fall)

ATP 455  **Clinical Practicum VI**  This course is a clinical field experience designed to expose sixth semester athletic training students to real-life situations relating to the evaluation and care of injuries and illnesses that may occur in the general population.  Content will include the directed observation of the duties and practice of a licensed physician, physician’s assistant and/or nurse practitioner and the direct observation of the duties and practice of a licensed physical therapist.  The course requires attendance at all pre-arranged office hours for the duration of the medical rotation for a minimum of 60 clock hours.  Prerequisite:  ATP 316.  Available only for students officially enrolled in the accredited athletic training major. 1 Sem. Hr. (offered spring semester)

ATP 480  **Senior Culminating Experience: Organization and Administration of Athletic Training.**  This course provides information in the organization and the administration aspects of comprehensive athletic training programs, including law, ethics, facility design, management, budget development, inventory control and therapeutic concepts.  Students will complete various collaborative and individual projects to facilitate learning and comprehension of topics.  Research design of a selected athletic training topic will be included.  This course will include current issues in athletic training and will conclude with a culminating project for athletic training majors. 4 Sem. Hrs.

ATP 494  **Honors Thesis/Project.**  A research project/course designed to meet the needs of the individual student seeking honors in the athletic training education major at graduation.  Prerequisites:  Senior standing and approval of the instructor, the department chair and the Honors Review Board.  Credit variable, 4 Sem. Hrs.

ATP 497  **Athletic Training Practicum: Assessment Applications.**  A clinical education course to prepare the student for competence as an entry-level certified athletic trainer in various athletic training clinical skills, focusing on the psychomotor aspects of injury/illness assessment, applying a problem-based, integrative approach.  Prerequisite:  ATP 216 and ATP 217. 2 Sem. Hrs. (typically offered spring semester)

ATP 499  **Internship in Sports Medicine/Athletic Training.**  An elective, off-campus field experience learning and serving in a medical or allied health setting.  The student intern will gain a hands-on, professionally supervised clinical experience and a broader perspective of the athletic training/sports medicine field.  The course provides practical application of theoretical knowledge gained in the classroom.  The experience is provided by the cooperating organization and the University.  Prerequisites:  at least junior standing.  Departmental approval is required prior to registration for this course. 1-12 Sem. Hrs. (typically offered every semester)

### Total Credit Hours

128

### Required Departmental Courses:

- ATP 115 Foundations of Athletic Training 4
- ATP 116 Orthopedic Applications in Athletic Training 2
- ATP 118 Medical Terminology and Health 4
- ATP 197 Immediate Care of Athletic Injuries 2
- Injury Recognition I: Head, Cervical Spine, & Upper Extremity 4
- **Total** 21

### Required Extra-Departmental Courses:

- BIO 210 Anatomy & Physiology I 4
- ATP 291 Therapeutic Rehabilitation & Modalities I 4
- ATP 292 Therapeutic Rehabilitation & Modalities II 4
- ATP 385 Sport Nutrition & Pharmacology 4
- **Total** 4

### Elective Courses:

- ATP 497 Assessment Applications in AT 4

*Note: Six semesters of directly supervised clinical field experience are required for graduation. These field experience courses must be completed under the direct supervision of qualified clinical instructors (ACs and/or CoAs). In an approved clinical setting, they are required and available only for students selected into the CAATE Accredited ATP. The required field experience courses must be distributed over at least six semesters, consisting of ATP 280, ATP 292, ATP 450, ATP 355, ATP 450 and ATP 455. Please see your advisor for additional field experience requirements.*

---

*This document is a template for degree tracking purposes. For specific information on courses, prerequisites, University regulations or Departmental policies, consult the university catalogue.*

*Courses listed in italics are required for the Integrative Core program.*
CLINICAL EXPERIENCE AND EDUCATION

OVERVIEW & PHILOSOPHY
Clinical experiences are an integral part of any athletic training curriculum and the importance of these clinical experiences should be viewed on the same level as the didactic (classroom) portion. For this reason, all clinical experiences occur as a part of the Clinical Practicum Experience in Athletic Training course sequence and academic credit is earned for them. These courses include both clinical education, in the form of in-class application of integrated care, as well as “real-world” clinical experiences where students engage in supervised clinical practice and gain experience. In order to be well prepared as Athletic Trainers, students must work diligently in the classroom to understand the material presented AND they must also work diligently in the clinical setting to apply their knowledge to real-world clinical situations and to develop a high level of clinical competence. Clinical experiences are NOT “work” experiences. Instead, they are educational experiences where classroom knowledge is applied in real-world settings, supervised by Allied Health Care Professionals.

CLINICAL EDUCATION
During the course of a clinical experience semester, all clinical proficiencies (CPs) assigned to each clinical practicum course must be evaluated and passed as competent for the ATS to progress to the next clinical experience course. Failure to complete and pass assigned clinical course CPs will result in clinical suspension, until those clinically assigned course CPs are evaluated and passed. It is the ATS responsibility to work with the clinical experience course instructor to develop a plan to complete the course requirements. Should an ATS fail to complete any assigned CP for that semester, the ATS will not be allowed to continue the clinical experience course progression, and therefore, will be unable to progress in the ATP.

CLINICAL EXPERIENCE
Six semesters of directly supervised clinical experience are required for graduation. These clinical practicum courses must be completed under the direct supervision of qualified preceptors, in an approved clinical setting; they are required and available only for students selected into the CAATE Accredited ATP. The required clinical experience courses must be distributed over at least six semesters, coinciding with ATP 230, ATP 232, ATP 350, ATP 355, ATP 450 and ATP 455.

Additionally, at least one high school experience will be incorporated into the required clinical experience rotations as well as exposure to at least one opposite gender sport, varying levels of risk, protective equipment and general medical experiences that address the continuum of care that would prepare a student to function in a variety of settings and meet the domains of practice delineated for a certified athletic trainer in the profession. Athletic training majors are encouraged to obtain clinical experiences in other allied medical settings, i.e., ambulance riding/observation or athletic/physical therapy settings and medical facilities as part of the overall clinical experience requirement.

Additionally, this curriculum is competency-based. Successful completion at the “master level” (a score of 80% or higher) of ALL educational competencies and clinical proficiencies (CPs) established by the CAATE, enumerated in the Mount Union Clinical Proficiency Verification Manual for Students, are required for BOC eligibility and for graduation. These educational competencies and clinical proficiencies are distributed appropriately throughout the required didactic course work and clinical experiences.

The general clinical education plan over the student’s four years progresses as follows:
Level I (Typically Freshman Year): Approximately 6hrs/biweekly
Level II (Typically Sophomore year): Approximately 12hrs/week
Level III (Typically Junior year): Approximately 15hrs/week
Level IV (Typically Senior Year): Approximately 20hrs/week

Level I:
Fifty hours per semester are required for a total of 100 hours for admittance into the UMU ATP. The scheduling of the pre-professional level I student will be directly supervised by the UMU Clinical Education Coordinator. The pre-professional level I student will work six hours biweekly plus any game observation time. During the fall semester each pre-professional level I student will have to observe hours with fall sports, such as football, soccer, volleyball, cross-country/track, etc. Additional opportunities will be available with fall lacrosse, fall baseball, fall softball, basketball, wrestling, indoor track, swimming, and ATF/Rehab. The spring semester will consist of hours spent with basketball, outdoor track, baseball, softball, lacrosse,
wrestling, and spring football. All students will observe hours with at least seven different sports teams during their pre-professional level I year.

Level II:
The level II year will consist of the students working 12 hours a week at their clinical assignments as scheduled by their preceptor. The students will rotate between preceptors with the preceptor being responsible for the scheduling students to specific sports. Each semester will consist of two rotations. The first rotation will include the first two months of the semester, while the second rotation will include the last three months of the semester.

Level III:
The level III year will consist of the students working 15 hours a week at their clinical assignments as scheduled by their preceptor. The students will rotate between preceptors with the preceptor being responsible for the scheduling students to specific sports. Each semester will consist of two rotations. The first rotation will include the first two months of the semester, while the second rotation will include the last three months of the semester. At least two months of their fall semester will be spent at a local high school working with a preceptor.

Level IV:
The level IV year will consist of the students working full time as the “Head Athletic Training Student” while under the direct supervision of a preceptor with an UMU sports team. It will be the responsibility of the student to attend all practices and events for that team. Sport selection will be based off a selection process. Larger sports or sports that greatly exceed 20 hours per week practicing may require multiple level IV Head Athletic Training Students as available. In addition to their senior sport assignment, they must complete a general medical rotation of 40 hours and a physical therapy rotation of 20 hours as assigned by the Clinical Education Coordinator.

PATIENT CARE POLICY
The application of therapeutic modalities, although potentially therapeutic, can pose a threat to the safety of patients (athletes) being treated if performed improperly. Therefore, it is forbidden for any ATS to apply any electrical modality treatment to a real patient (athlete) in a real situation prior to that ATS having been formally instructed and assessed by the instructor of ATP 291 Therapeutic Rehabilitation I and ATP 292 Therapeutic Rehabilitation II.

Additionally, it is forbidden for an ATS to perform any electrical modality treatment to a real patient (athlete) in a real situation without the direct supervision of a Preceptor who is physically present and able to intervene on behalf of the athlete being treated if needed. This rule applies until the ATS becomes a BOC Certified Athletic Trainer and a licensed Athletic Trainer, if applicable by the state law of residence (including Ohio).

CELL PHONE USAGE
Cell phones should be used in a professional capacity, keeping in mind that as an ATS you are working as an Allied Health Professional. It is expected that each ATS will discuss with his/her Preceptor what he/she deems appropriate usage to be. A student who is found to have excessive usage of his/her cell phone as determined by a Preceptor will be grounds for disciplinary action. Faculty, Staff, and Students cell phone numbers may be distributed to necessary personnel for communication purposes.

Students have the ability to allow or not allow their phone numbers to be released by signing the Cell Phone Number Release Form Appendix O.

MANDATORY MONTHLY ATP MEETING & EDUCATIONAL OPPORTUNITIES
The UMU ATP feels that it is important for all students to stay up to date with the changes that are constantly occurring within the field of athletic training, the UMU ATP Faculty and Staff will invite experts in various fields to come and educate us on the current topics. Attendance is mandatory. If an absence does occur, it will be handled in the same manner as a missed day at your clinical rotation and will be dealt with accordingly. The meetings and educational opportunities will be scheduled and announced well in advance so as to prevent any conflict with other academic commitments.
CLINICAL EXPERIENCE SUPERVISION

Although one of the major goals of a clinical experience is for students to become autonomous in their skills and decision making, students should never confuse autonomy with unsupervised practice. Students will ALWAYS practice athletic training under the supervision of a UMU Preceptor. Autonomy in practice by students refers to students becoming proficient to the extent that they collaborate in making and implementing decisions regarding the care of their patients. Students should work to become competent and comfortable in decision-making, but all care related decisions made by students must be reviewed with their supervisors prior to implementation. Clinical experiences will frequently involve student autonomy in activity and collaboration in decision-making, but students are never the primary care provider for a patient or team. To this end, it is wholly incorrect for a student to see themselves as “the athletic trainer” for a team or to look at his/her time in clinical experience as “covering” a practice or a game. Instead, clinical experiences must be seen from an educational perspective and the students must see themselves as being there to learn and to increase in skill and to develop an understanding for and appreciation of all aspects of the profession.

The UMU ATP clinical experience education is a vital part of the athletic training student’s complete learning goals. Clinical experience integrates the didactic knowledge from the classroom with the practical application of athletic training skills and critical decision making, under direct supervision, to develop the confidence and real world experience while adhering to the standards of supervision of clinical experience education set forth by CAATE. At no time should athletic training students work independently of their assigned Preceptor, or make decisions without the collaboration of their Preceptor, nor should supervision of an ATS be transferred to any person other than the assigned Preceptor without the express written approval of the UMU ATP PD. At no time will the athletic training student be viewed as a replacement of a certified athletic trainer.

CAATE AND UMU SUPERVISION STANDARDS AND GUIDELINES

Clinical Education
Clinical education must follow a logical progression that allows for increasing amounts of clinically supervised responsibility leading to autonomous practice upon graduation. The clinical education plan must reinforce the sequence of formal instruction of athletic training knowledge, skills, and clinical abilities, including clinical-decision making.

Clinical education must provide students with authentic, real-time opportunities to practice and integrate athletic training knowledge, skills, and clinical abilities, including decision-making and professional behaviors required of the profession in order to develop proficiency as an Athletic Trainer.

Clinical education must allow students opportunities to practice with different patient populations, care providers, and in various allied health care settings relative to the program’s mission statement.

Clinical education assignments cannot discriminate based on sex, ethnicity, religious affiliation, or sexual orientation.

Clinical Education Experience
Students must gain clinical education experiences that address the continuum of care that would prepare a student to function in a variety of settings with patients engaged in a range of activities with conditions described in athletic training knowledge, skills and clinical abilities, role delineation study and standards of practice delineated for a certified athletic trainer in the profession. Examples of clinical experiences must include, but should not be limited to:

1. Individual and team sports
2. Sports requiring protective equipment (e.g., helmet and shoulder pads)
3. Patients of different sexes
4. Non-sport patient populations (e.g., outpatient clinic, emergency room, primary care office, industrial, performing arts, military)
5. A variety of conditions other than orthopedics (e.g., primary care, internal medicine, dermatology)
Direct Supervision
Constant visual and auditory interaction between the student and the Preceptor must be maintained. The Preceptor must be physically present for proficiency instruction and evaluation.

Supervision
Daily personal/verbal contact at the site of supervision between the athletic training student and the Preceptor, who plans, directs, advises, and evaluates the students’ athletic training field experience. The Preceptor shall be physically present to intervene on behalf of the athlete/patient.

Clinical Experience: includes experiential learning opportunities for the athletic training student under the direct supervision of a Preceptor to practice and apply the entry-level Athletic Training Clinical Proficiencies in a clinical environment. Settings for these experiences typically include athletic training facilities, athletic practices and competitive events.

UMU Clinical Experience Supervision Policy
The UMU ATP does not support unsupervised clinical experiences nor are they considered part of the athletic training student’s clinical educational experience. Athletic training students may not represent themselves as an athletic trainer or perform athletic training duties outside of their clinical experience. However, there may be unplanned times that an athletic training student is briefly unsupervised. During these uncommon times ATS will not engage in athletic training activities. At any time should an ATS find him/herself in an unsupervised situation he/she understands that he/she has the opportunity to act as a voluntary first aid provider, and can only provide first aid services, which will be viewed as non–compulsory. This voluntary opportunity may be refused by the ATS at any time. This refusal will have no detrimental effect on the athletic training student’s clinical education. As part of the matriculation process, all ATS will read, understand and sign the Code of Conduct agreement (Appendix C), which includes unsupervised situations, prior to being allowed to perform athletic training clinical experiences.

GUIDELINES FOR STUDENTS IN UMU ATP AND CLINICAL EXPERIENCES
What follows are some general guidelines and expectations for clinical experiences. At the commencement of each clinical rotation, it is the responsibility of the ATS to clarify all guidelines and expectations with their specific clinical preceptor.

PROFESSIONAL APPEARANCE, ATTIRE, AND GROOMING
Good grooming and personal hygiene are essential for health care providers and usually is the basis for your patients’ first impression of you. Along these lines, ATS should maintain a neat and professional appearance at all times during clinical experiences. Their appearance should not distract from the professional image they are trying to develop. Any jewelry should be minimal, professionally tasteful, and should not interfere with the performance of any clinical procedures or tasks. Extremes of appearance are to be avoided during clinical experiences.

Students should be aware that clinical experiences require specific professional attire. Students are issued and have the opportunity to purchase UMU athletic training uniform shirts and other gear. Only clothing that is UMU Athletic Training oriented and pre-approved will be acceptable for clinical experiences. Certain clinical experiences (games, events, travel, etc.) will require a specific dress code that may vary from other clinical experiences. Students should clarify the dress code for each specific clinical experience with their clinical preceptor on or before the first day of the clinical experience. Students who do not comply with the dress code for their clinical experience may be excused from the experience for the day and subject to disciplinary action. An ongoing pattern of inappropriate dress may be grounds for dismissal from the experience and/or ATP. Be sure to clarify appearance expectations with your clinical preceptor prior to beginning each clinical experience.

On occasion, there will be opportunities for the ATS to participate in extra events (e.g. Conference championships, tournaments, HS events, etc.). When these events are organized by UMU Athletics, you will be supervised by a UMU Preceptor and the event is considered part of your clinical experience. In these situations, the usual dress code will be in effect. In the event that these extra events are not associated with a clinical experience (i.e. you are not being supervised by a UMU Preceptor then you are not functioning as a component of the UMU ATP, nor are you functioning as an Athletic Training Student. In these situations, you should NOT wear any UMU athletic training uniform attire or any clothing that would identify you as an athletic training student.
DRESS CODE FOR ATS and LEVEL ONE CANDIDATES

1. NO JEANS! NO COTTON SWEATS! (No exceptions!)
2. Khaki, black, Navy-blue, grey pants/shorts (solid color), non-athletic shorts.
3. If shorts are worn they must be the appropriate professional length.
4. UMU or neutral raingear is acceptable during inclement weather.
5. Clean UMU or Raider hats only; worn with the bill pointing forward only
6. Uniform t-shirt, polo-shirt, sweat shirts and jacket
   a. The uniform shirts, sweat-shirts and jackets should be the outer-most, visible garment worn whenever possible. However, during inclement weather (rain, cold, etc), the most protective, appropriate outerwear is acceptable. A UMU garment is always preferred.
   b. Uniform shirts must be tucked in at all times!
   c. Some sport events require shirt-tie and/ or dress/skirt always (TBA).
   d. Candidates may wear UMU ATP issued Candidate shirts, UMU t-shirts, or white polos.
7. Tennis shoes for most field experience activities. Exceptions may be made for inclement weather, indoor events, etc. Dress shoes are acceptable.
   a. No sandals, Crocs, all shoes must be closed-toe.
8. It is expected that students will have their shirt tucked in, be wearing a belt, a watch, and have a pen available.

PROFESSIONAL CONDUCT
Among your first and most important goals in this program is to earn the professional respect of your patients, peers, and supervisors. Respect is key to developing a good rapport with patients, physicians, coaches, etc., key to obtaining recommendations that may lead to employment opportunities, and key to your ultimate professional success. This respect will never be earned without first demonstrating a strong sense of personal responsibility that goes hand-in-hand with being in a profession that places the well-being of others as its highest priority.

- You need to demonstrate personal responsibility on a daily basis in this program. You can do so by, first, demanding excellence of yourself and second, demanding it from those around you.
- You must assume personal responsibility for your own success by seizing upon every available opportunity to grow and develop professionally and seeking out the quality opportunities that are less available.
- You must assume personal responsibility for the health and well-being of your patients by never compromising their quality of care or assuming someone else will make sure the patient gets the care that they need.
- You must assume personal responsibility for the quality and condition of your working environment by being meticulous about the upkeep of facilities and equipment.
- You must assume personal responsibility for getting the job done by never blindly assuming that someone else will take care of it.
- You must assume personal responsibility for your reputation and this program’s reputation by never compromising on your professionalism and work-ethic.
- You must assume personal responsibility for your conduct in your classes, your clinical experiences, and in your personal life and recognize that all three will influence people’s respect for you.
- You must assume personal responsibility for your mistakes by acknowledging them and learning from the constructive criticism that accompanies them.
- You must assume personal responsibility for maintaining the legacy of the students who went before you by working hard to be excellent rather than assuming you will be excellent simply because others who preceded you worked hard and became excellent.
HEALTH AND SAFETY
Per the 2012 CAATE standards: Health and Safety (Standards 78-80)

78. All sites must have a venue-specific written Emergency Action Plan (EAP) that is based on well-established national standards or institutional offices charged with institution-wide safety (e.g. position statements, occupational/environmental safety offices, police, fire, and rescue)
79. The program must have a process for site-specific training and review of EAP with the student before they begin patient care at that site.
80. Students must have immediate access to the EAP in an emergency situation.

It is important that each athletic training student be familiar with each venue that he/she is working and receive site specific training and review the emergency action plan for each sport he/she is working. At the beginning of each clinical rotation, site specific training and review of the emergency action plan will take place and be documented using Appendix E and be placed in his/her ATP file.

UNETHICAL AND CRIMINAL ACTIVITY
ATS are expected to abide by the University’s Student Code of Conduct and by all laws of the State of Ohio. Student conduct violations may result in severe penalties including expulsion from the University. Violation of state laws can potentially result in a student becoming ineligible to obtain BOC certification to practice Athletic Training. Any criminal activity may be grounds for disciplinary action, including those incorrectly perceived as “minor violations” by ATS. Violations such as drug/alcohol/tobacco violations, theft, and more severe crimes are all potential grounds for disciplinary action.

UMU ATP DISCIPLINARY POLICY
The UMU ATP will operate on a “three strikes and you’re out” policy for the enforcement of the policy on professional conduct. If not initiated by the ATP PD, the supervising Preceptor will contact the ATP PD in the event disciplinary action is warranted. Appendix F and Appendix G will be completed and placed in the student’s file.

1st Offense - will result in a verbal and written warning that will be placed in the student’s ATP file.
2nd Offense - will result in a second verbal and written warning that will be placed in the student’s ATP file, along with a meeting with the Preceptor, PD, and student.
3rd Offense - will result in expulsion letter from the ATP PD. An offense warranting disciplinary action may be defined, but is not limited to the examples below:

Violation of the UMU ATP Policy on Professional Conduct
• For example: Failure to attend a clinical assignment without an approved leave of absence form completed prior to the absence or a valid excuseable reason for absence.

Display of unprofessional behavior during a clinical rotation or ATP function
• For example: Use of inappropriate language and or behavior during clinical hours.

Violations of any UMU Academic or Institutional policies
• For example being found guilty of Academic Dishonesty in any course

ALCOHOL,TOBACCO, AND DRUG POLICY
Link to UMU Student Handbook – Alcohol and Other Drug Use/Abuse Policies and Programs – http://portal.mountunion.edu/student_life/studenthandbook/studentrightsandresponsibilities/Pages/AlcoholAndDrugUse_Abuse.aspx
Path – iRaider -> Student Life -> Student Handbook -> Student Rights and Responsibilities
The following policies specific to the Athletic Training Program are in addition to federal, state, local and University policies.

- **Alcohol**
  - If 21 or over, there will be no alcohol consumption **during or 12 hours prior** to any athletic training duties or responsibilities.
  - At no time should alcohol be consumed while wearing athletic training apparel.
  - All policies apply during away travel.
  - Athletic Training Students are expected at all times to behave in a professional and responsible manner.

- **Tobacco**
  - Tobacco use is not permitted while wearing any athletic training apparel.
  - An ATS reporting for clinical experience and smelling of a tobacco product (as determined by any Preceptor), may be sent home to change and counted absent for that clinical experience.

- **Drug Use**
  - Use of any illicit drug at any time will be considered a violation.

**Disciplinary Action**

Any violation of federal, state, local, university or program policy with regard to alcohol, drugs, and tobacco will be considered a violation.

**Violation Resulting in a Charge of Serious Crime:**

Per Section 5 of the Board of Certification Professional Practice and Discipline Guidelines and Procedures, any person who is or will become a BOC applicant has a duty to notify the BOC of any charge of serious crime within ten days.

**Serious Crime as defined by section 5.3.1 is:**

1. any felony
2. a misdemeanor related to public health, patient care, athletics or education.
   
   This includes but is not limited to: rape; sexual or physical abuse of a child or patient; actual or threatened use of a weapon of violence; the prohibited sale or distribution of controlled substance, or its possession with the intent to distribute; or the use of the position of an athletic trainer to improperly influence the outcome or score of an athletic contest or event or in connection with any gambling activity; and/or an attempt, conspiracy, aiding and abetting, or solicitation of another to commit such an offense.

If the BOC rules that the Athletic Training Student will not be eligible to take the BOC exam, immediate expulsion from the University of Mount Union Athletic Training Program will result.

If the BOC ruling is in favor of student eligibility, then disciplinary actions for “other violations” as outlined below will still apply.

**Other Violations not resulting in charges:**

**First Violation** will result in a written warning and may require appropriate counseling services.

**Second Violation** could include suspension from the ATP for a period of time and may result in expulsion from the Athletic Training Program.

**Further Violations** could include suspension from the ATP for a period of time up to a year and may result in expulsion from the Athletic Training Program.

All incidents and disciplinary actions of the ATP are subject to review at the discretion of UMU ATP Disciplinary Board and UMU administration.

**Expulsion from the UMU ATP does not automatically lead to dismissal from the University of Mount Union.**
Sound Judgment
As a healthcare provider, your ability to make sound judgments while under pressure is absolutely vital to your success and to your professional credibility. Anything that would cause the soundness of your judgment to be questioned will weaken your reputation. This is true of both your professional and personal judgment.

On a professional level, you are held to a legal standard of care that involves acting in the manner that would be expected of a reasonable and prudent person with similar training. Part of this is practicing within the bounds of a student and not overstepping your bounds by engaging in unsupervised practice.

On a personal level, your judgment will be a significant factor in your ability to garner favorable recommendations, to open doors to new opportunities, and to earn the respect of your peers, patients, and supervisors. Do not make the mistake of thinking that your actions in your private life will not influence your professional life. The two are far more interrelated than many students realize. Your actions outside of your duties as an athletic training student can and do affect your future. Lapses in judgment such as alcohol or controlled substance law violations, poor conduct at professional meetings or alumni functions, inappropriate voicemail greetings or email addresses, posting embarrassing (or illegal activity) photos or information on publicly accessible websites (like myspace, facebook, twitter, instagram, vine, pinterest), etc. will cause your judgment to be questioned by your peers, your supervisors, your patients and your potential employers. If you demonstrate questionable judgment, you should not expect to receive favorable recommendations from your faculty and staff nor should you expect the faculty and staff to put their personal reputation or this program’s reputation in jeopardy by creating special opportunities for you. If you want access to the kinds of opportunities that this program is known for creating, then earn them through your judgment and your work ethic.

Social Media Policy
Path – iRaider -> Marketing -> Social Media Policy

Punctuality
Students are expected to be punctual for their classes and clinical experiences. Tardiness is not acceptable for practicing professionals and it is therefore not acceptable for ATS. Any instance of tardiness should be accompanied by an appropriate, documented excuse. Outside jobs and student organization obligations are not an appropriate excuse for tardiness or absenteeism. An ongoing pattern of tardiness or absenteeism is ground for disciplinary action, removal from a field experience assignment, and potentially for dismissal from the ATP.

RECORDING CLINICAL HOURS FOR STUDENTS MATRICULATED INTO THE PROGRAM
All athletic training clinical hours must be recorded on ATRACK even if you are at a HS rotation or a Medical Rotation. It is expected that hours will be turned in weekly. It is expected that when an ATS signs in for clinical rotation hours it will should be rounded to the next quarter of an hour. For example if a student arrives at 1:01pm the hours should be recorded as 1:15pm. When signing out of your clinical rotation hours should be rounded to the previous quarter of an hour. For example if a student leaves at 3:55 the hours should be recorded as 3:45pm.

When recording hours it is expected that students will record which clinical rotation he/she is working with:

- VB volleyball
- WSC women’s soccer
- XC cross country
- WBB women’s basketball
- SB softball
- ODT outdoor track
- WLAX women’s lacrosse
- WTN women’s tennis
- ATF athletic training facility
- PT physical therapy clinic
- FB football
- MSC men’s soccer
- IDT indoor track
- MBB men’s basketball
- WR wrestling
- BSB baseball
- MTN men’s tennis
- MLAX men’s lacrosse
- HS high school-school where your rotation is
- DOC physician’s office

When logging which sport please note if you are working a practice or a game.
ATRACK hours will then be electronically signed by the preceptor on a weekly basis. Any questions regarding your hours should be presented to ATP PD as soon as possible.

RECORDING CLINICAL HOURS FOR A LEVEL ONE CANDIDATE
An ATP candidate is expected to record his/her hours in the level one candidate logbook in the Gorman Athletic Training Facility. It is expected that a level one candidate will record their hours as listed above for matriculated students. It is also expected that the candidate will have his/her hours signed weekly by the Preceptor he/she is working with. ATS Candidate Hour Log and Sport Hour Log can be found in Appendix H and Appendix I.

If a UMU ATP ATS has been found to have lied on his or her hour log the hours will be null and void and the student will be suspended the remaining of the week from his/her clinical rotation and this may also be grounds for further disciplinary action.

PROCEDURE FOR BEING EXCUSED FROM A CLINICAL ASSIGNMENT
If a student cannot make an assigned hour, practice, game or any other ATP function, the following procedure must be used:
1. The athletic training student must fill out a leave of absence form (see Appendix I or in the Downloads section of the UMU ATP website: http://www.mountunion.edu/athletic-training-major). This includes the date required for time off and must be signed by the supervising Preceptor for approval. Once the form is signed it must be turned in to the ATP PD.
2. Try to contact another athletic training student to replace you. If you find a replacement you must:
   A. Inform your replacement of what time to be there.
   B. Inform them of the duties and responsibilities they need to cover.
   C. Inform them of any athletes that need to be taped and special taping that you do.
   D. Inform them of any athletes that need to be treated and what they need to have done to them.
   E. Inform your Preceptor of the date of your absence and who your replacement is through a completed absence notification form.
3. If you cannot find a replacement, you must call your Preceptor at least 24 hours in advance; to inform them you will not be there. The only exception will be in the case of an emergency when notice time may be less. Any conflicts that are known about in advance must be taken care of in advance.** EXCUSES WILL NOT BE ACCEPTED.**
4. If you are sick, you must go to UMU Health Center in order to be properly excused. NO excuses for being sick will be valid unless the athletic training faculty/staff receives notice from the health center.

Failure to adhere to the above guidelines will result in disciplinary action.

Reference: Mr. Trevor Bates, Heidelberg University ATP Director, AT Student Handbook 22

RELATIONS WITH OTHER MEDICAL PROFESSIONALS
Students should be very professional when interacting with physicians and other medical professionals. These interactions are very important to the clinical education of the ATS and they are to be actively pursued. Students are encouraged to ask questions when appropriate and to use appropriate professional jargon. Avoid the use of laymen’s terms with professionals and avoid using jargon with patients.

RELATIONS WITH ATHLETIC PERSONNEL (i.e. Coaches, Managers, Scouts, Sports Information):
It is important that ATS learn to develop professional relationships with the coaches of teams with whom they are completing clinical experiences. Generally, your clinical preceptor will provide status reports to coaches although students will be required to do this on occasion as part of their education. You should discuss how to handle coaches’ questions with your clinical preceptor. Generally, students’ interactions with coaches should increase with each clinical experience. Occasionally, such interactions can present difficulties. If an ATS has difficulty with a coach or athlete, he/she should make this known to the clinical preceptor immediately. Most problems can be easily resolved if approached early. Delay in dealing with a problem makes it more difficult to resolve.
RELATIONS WITH ATHLETES
The student-athletes and patients at UMU and any of our affiliated clinical sites are your PATIENTS. They are NOT your peers, NOT your social group, and NOT your dating pool. They can sometimes be your friends, but YOU must maintain the boundaries of such friendships so that you do not compromise your professional relationship. You must earn the respect of your patients in order to be effective care providers to them. The person who is your drinking buddy or date will almost never trust you to be the person who takes care of their serious healthcare needs. Understand that the nature of your relationship with your patients is a professional one first and a friendship second. You are NOT in their chain of contact for emergencies and you ARE NOT PERMITTED to provide them care outside of your supervised role as a student. If a student athlete calls you personally to request care for a problem (whether it occurs in athletics or outside of athletics) you should advise them to seek care in an AT facility or in the emergency room as is appropriate and you should also notify your preceptor at the first opportunity to do so. You should never provide private “after hours” or “off the books” care that circumvents the healthcare plan that we have put in place for our student-athletes and patients. Doing so is both unethical and illegal.

RELATIONS WITH OTHER ATHLETIC TRAINING STUDENTS
Romantic relationships with other ATS are discouraged. The breakup of relationships can create a hostile atmosphere in clinical facilities and/or clinical experience settings where the students are assigned. Such an atmosphere is detrimental to the learning of students and delivery of patient care in the facility. Students creating a hostile environment will be removed from their clinical experience assignment for the duration of the experience and this may lead to a failing grade in the Clinical Experience course.

PROFESSIONAL RESPECT AND DIFFERENCES OF OPINION
It is foreseeable that ATS will have differences of opinion with other students or supervisors regarding patient care. In such cases, students should NEVER express to the athlete/patient their disagreement with the plan of care or decisions of their peers, their supervisors or physicians. Instead, students should discuss disagreements privately with the other ATS, Preceptors, or physician. Never argue in the presence of the patient – it only serves to undermine the patient’s confidence in both you and the other person. Likewise, ATS should show appropriate professional respect for their instructors, supervisors, physicians, coaches, patients, etc. Disrespectful behavior is unprofessional as it compromises the care of the patient. It may be grounds for removal from a clinical experience assignment. An ongoing pattern of disrespectful behavior may be grounds for disciplinary action.

HARASSMENT AND DISCRIMINATION
Harassment of other students, athletes, staff, etc. is a severe breach of professional ethics. Harassment and discrimination can take many forms including but not limited to sexual harassment (including sexual preference discrimination), gender discrimination, racial/ethnic discrimination, religious discrimination, sport-based discrimination, socioeconomic discrimination, etc. Athletic Training must be a color blind and gender blind profession in terms of the quality of care provided. No form of harassment or discrimination will be tolerated and ATS engaging in such discrimination in classes or clinical experiences will be immediately removed from the experience. An ongoing pattern of harassment / discrimination may be grounds for disciplinary action.

UMU ATP STUDENT PARTICIPATION IN INTERCOLLEGIATE ATHLETICS
Many prospective students who express interest in UMU’s ATP are also interested in participating in intercollegiate athletics. We have had many alumni in our ATP who were successful in balancing both the demanding curriculum of the ATP and intercollegiate athletics. The ATP does have a significant clinical component that requires a strong commitment on behalf of the student. This involves a weekly average of 20 hours that includes a combination of morning, afternoon, evening and weekend time commitments. Time conflicts between sport demands and clinical requirements may occur if careful planning is not taken into consideration. The Athletic Training Faculty and Staff are committed to encouraging students and assisting them in taking advantage of the many opportunities afforded to them at Mount Union. We are also dedicated to guiding the student and the student athlete so he/she fulfills the graduation requirements of the Athletic Training major, has diverse and quality clinical experiences and graduates within the four-year plan. The following guidelines are designed to help accomplish these goals:

- The intention on the part of a prospective student to participate in intercollegiate athletics shall not factor into the admissions decision for the ATP.
- Athletic Training students shall limit their participation to one intercollegiate team.
• Participation in the student athlete’s non-traditional season is subject to the availability of his/her schedule only after fulfillment of clinical rotation responsibilities.

• Athletic Training students who participate in intercollegiate athletics must, like all students, fulfill all the didactic and clinical program requirements before he/she may graduate. All such students are strongly encouraged to consult with the ATP Director for effective planning to ensure on-time graduation.

• All students are required to have at least one “equipment-intensive” clinical experience (e.g., football). Student athletes who play a fall sport may achieve this requirement through a clinical rotation assignment with lacrosse in the spring or one of our other affiliated sites.

Those participating in collegiate athletics with scheduling conflicts will need to meet with the PD to resolve these conflicts.

Reference: Mr. Trevor Bates, Heidelberg University ATP Director, AT Student Handbook 25

EXTRACURRICULAR ACTIVITIES
At the University of Mount Union, students in the ATP are often involved in a number of extracurricular activities, such as varsity sports, intermural sports, Greek Life or many other UMU organizations. ATS must remember that his/her education should come first when considering joining extracurricular activities.

ON CAMPUS & OFF CAMPUS EMPLOYMENT
The UMU ATP Faculty and Staff understand that a student may need to seek outside employment to help pay for schooling. ATS must understand that it is expected that he/she will schedule these hours around his/her athletic training responsibilities.

ATS TRAVEL POLICY
As part of the clinical experience ATs will travel with their Preceptors as representatives of the UMU ATP. Students are expected to conduct themselves with the highest level of professionalism. On a professional level, you are held to a legal standard of care that involves acting in the manner that would be expected of a reasonable and prudent person with similar training. There are two situations that a student may travel:

1. Supervised Athletic Team Travel Opportunities
Supervised is defined as traveling off-campus with a UMU Preceptor to an event, practice or competition. All athletic training students are required to participate in supervised travel as a part of the clinical education requirement for the ATP as assigned by the supervising Preceptor.

2. Academic Related Travel Athletic Training students will also occasionally travel with a UMU ATP faculty and staff members to academic conferences and other educational events.

ALL athletic training students who travel with an athletic team as a partial requirement for a clinical assignment must agree to the following terms:

1. Athletic Training Students must remain with the traveling team and under the supervision of the Preceptor or coach at all times.

2. Athletic Training Students wishing to leave the supervision of their Preceptor or designee must provide written permission/documentation from a parent or guardian.

3. Athletic Training Students are not permitted to receive transportation from any individual other than a parent or guardian (with written permission) during a university

4. At the beginning of each academic semester every ATS will complete and sign the UMU Student Travel Agreement (Appendix K), the UMU Release, Hold Harmless, & Indemnification Agreement (Appendix L) and UMU Emergency Medical Form (Appendix M). These forms will be completed in ATP 230, ATP 232, ATP 350, ATP 355, ATP 450, and ATP 455. An ATS will not be able to travel unless these forms are completed, signed, and turned in to the PD.
CARE OF FACILITIES AND EQUIPMENT
All clinical experience locations have nice facilities and equipment for student use during classes, laboratories, and clinical experiences. These will remain nice only if EVERY ATS takes personal responsibility for their care and upkeep. If you don’t take pride in maintaining what you have, you will not have it. For example: No cooler (or lid) should EVER be put away without being washed and disinfected. All patient care areas should be kept meticulously clean at all times. Gators, golf carts, etc. should be driven far more carefully than you drive your own car. All Athletic Training facilities should be treated like a hospital and not like a locker room. Supplies are expensive and should never be wasted. Access to our facilities and equipment should be closely monitored and problems reported immediately. You are not to take equipment off site without consent of your supervising Preceptor (i.e. coolers for home use).

General Guidelines:
1. If it needs to be done….YOU do it and don’t assume someone else will.
2. If you take it out….put it away when you are done.
3. If you make it dirty….clean it up.
4. If you used the last one….re-stock or tell your supervisor if we are out.
5. If someone shouldn’t be using something….don’t let them have it.
6. If you broke it….fix it or accept responsibility and tell your supervisor. We realize accidents happen.
7. If you haven’t been trained to do it….don’t do it without your supervisor’s assistance.
8. If you are unsure….ask your supervisor.

REMOVAL/SUSPENSION FROM CLINCIAL EXPERIENCE
Clinical supervisors have a primary responsibility to ensure the safety of and provide care for their patients. To this end, a clinical supervisor may remove an ATS from his/her clinical assignment at any time for conduct that compromises the safety or care of the patient or others at the clinical experience site. Behaviors that are grounds for temporary removal from the clinical assignment include but are not limited to confidentiality breeches, harassment, absenteeism or tardiness, malpractice / negligence, failure to fulfill responsibilities, or other activities that the supervisor deems as unsafe or inappropriate. Ongoing patterns of unsafe / unprofessional behavior are grounds for disciplinary action.

ATP EVALUATION
Throughout the course of the ATP, all aspects will be regularly evaluated to determine the effectiveness and quality of the educational delivery of the clinical experience program. ATS will be evaluated on their performance at the mid-term and completion of each rotation to determine their readiness to progress in the program. The mid-term evaluation will be an informal meeting with the preceptor, whereas the evaluation at the end of the rotation will be done via ATRACK.

The supervising Preceptor as well as the clinical site will be evaluated by the ATS at the end of each rotation. This evaluation is used to determine the overall quality of the education delivered by the Preceptor as well as the appropriateness and quality of the clinical site as perceived by the ATS assigned to that Preceptor and site.

Upon completion of the ATP, graduating students will have the opportunity to evaluate the ATP as a whole. The quality of both the didactic and clinical portions will be assessed to determine their perception of the overall effectiveness in preparing them for the successful completion of the BOC exam and for entry level practice as a certified athletic trainer.

Following each graduates first year of employment after graduation, both the graduate and the graduate’s employer will have the opportunity to evaluate the UMU ATP in terms of its ability to prepare the graduate for successful employment, graduate school and/or practice as an athletic trainer.

LETTERS OF RECOMMENDATION REQUESTS
Due to the high volume of requests received by faculty and staff, and the varied nature of letter of recommendation requests, athletic training students are required to utilize the “Letter of Recommendation Request Form” to help faculty and staff write strong, meaningful letters of recommendation on behalf of students in the Athletic Training Program.
APPENDIX A
UMU Athletic Training Program
Code of Ethics

In addition to the NATA Code of Ethics, the following standards apply to those involved with the University of Mount Union Athletic Training Program. Failure to abide by these standards can lead to permanent expulsion from the program.

1. Be honest with yourself and your ability. Admit if you lack the knowledge or skill, and do not attempt to bluff your way through.
2. Under no circumstance should you attempt to carry out a procedure or evaluate an injury/illness unless you have the knowledge and proficiency mastered.
3. Altering, copying, sharing, removing, or tampering with medical records is not tolerated and is a violation of the law.
4. Medical confidentiality is to be strictly maintained. Be wary of your surroundings when discussing an injury/illness, and be mindful when working on medical records. Colleagues and teammates do NOT have a right to know other’s conditions; furthermore, it is illegal.
5. Use good judgment when discussing the events of the day-practice, occurrences in the athletic training facility, etc. Even though they may not be medical in nature, much of what you experience here is not for public knowledge.
6. Encourage and promote scholarship achievement in others. Strictly adhere to the Academic Integrity policies of UMU.
7. Use of non-therapeutic drugs for any purpose is not condoned.
8. Negative actions in or outside of the ATP may have a profound effect on your continuing in the program, especially if they affect patient safety or trust in you.
9. Be professional at all times while representing UMU. Your dress, your mannerisms, attitude, integrity and character should reflect positively on the UMU ATP, while at home and away.
10. Unless given permission by your Preceptor, you are to strictly adhere to team rules while traveling. You are not to be in athlete’s or coaches rooms after curfew, nor are they allowed to be in your room.
11. Be cooperative, courteous, and considerate to staff, coaches, colleagues, student athletes, and visitors. Represent our program and the medical profession accordingly.
12. Avoid rude behavior, inappropriate language, discriminatory remarks or behaviors, and criticism of others.
13. Adhere to the Honor code= do not lie, steal, or cheat.
14. You are to show respect for the Preceptors affiliated with the UMU ATP. Any comments or actions interpreted as being disrespectful will not be tolerated.
15. Always be early, prepared, and professional.

Reference: ECU ATS Handbook 2007, Dr. Katie Walsh PD 66

I agree to comply with the NATA and UMU ATP Code of Ethics. I understand failure to uphold the NATA or UMU ATP Code of Ethics may result in disciplinary action.

______________________________    ______ ________________
Printed name       Date

______________________________
Signed name
In the performance of your duties as a student member of the Mount Union Accredited Athletic Training Program (ATP), and/or as a candidate for said program, you have access to privileged medical information regarding UMU student-athletes. This access is essential for the proper care and disposition of athletic injuries. This access also presents a great responsibility. Medical information which you may become knowledgeable of is subject to the physician/patient privilege as well as by the federal laws established by the Health Insurance Portability and Accountability Act (HIPPA) and must be considered confidential.

In any health care facility, CONFIDENTIALITY is not a choice of life; it is a way of life, essential to the best in patient care. Each Certified Athletic Trainer (AT) and athletic training student (ATS) and program candidate (Pre-Professional Level 1) in the ATP is responsible for upholding the code of ethics relating to medical confidentiality when involved in patient care to patients (UMU student-athletes), which includes:

All information gathered regarding a patient (student-athlete), the patient’s personal life and the care rendered to the patient must be treated confidentially. Each member of the ATP, faculty, staff, students and candidates has both a moral and legal obligation to guard against inappropriate release of confidential, private information.

Patients and their families must have assurance that their medical information as well as any personal idiosyncrasies will not be passed on to others unless the patient specifically requests that the information may be released. The permission to release confidential information MUST be in writing!

“THINK BEFORE YOU SPEAK!” Members of the ATP must be aware of where, to whom and what about they are speaking. Carelessness can lead to breach of patient’s privacy. There is never a right way to say the wrong thing.

Members of the ATP must guard against inappropriate viewing of a medical record. Not all ATP members are engaged in the treatment of any given patient and therefore, must have a legitimate reason to view any particular record. Viewing of medical record charts must be coordinated and approved through the supervising ACI/CI.

“WHEN IN DOUBT, DON’T GIVE IT OUT!” it is always better to not release information when there is a doubt. Members of the ATP and patients are better protected by refusing to give information then they are if they breech confidentiality.

Your signature on the Confidentiality Statement is a requirement for ANY participation in, and admission to the ATP. This form will be kept in your personal file for the duration of your involvement in the program. Any breach of this affidavit may result in your dismissal from the ATP and possible legal action.
CONFIDENTIALITY AFFIDAVIT
For Athletic Training Students
At Mount Union

The Ohio Supreme Court has created the tort of breach of confidentiality. The purpose of this tort is to transfer the risk of mismanagement of confidential information to the appropriate party. Thus, it applies to the disclosure of medical information which is limited to employees, students, subcontractor, agents, licensees or invitees. In the case of off-campus clinical field experience agreements, the athletic training student from Mount Union is the “student invitee”.

By virtue of my signature below, I understand and agree that, in performance of my duties a program athletic training student or candidate thereof, the possibility may exist for exposure to confidential patient health and medical records information (“confidential information”).

I hereby agree to maintain the highest level of confidentiality of any confidential information. I will not directly or indirectly disclose, discuss or otherwise impart any confidential information to anyone, with the exception of UMU Sports Medicine and/or Athletic Training personnel and/or coaching staff (only on a need-to-know basis). I will abide by this agreement at all times and will not disclose such information at any time to any other person(s). I also understand that my intentional or involuntary failure to maintain the confidential or private medical information is a violation of the confidentiality requirement and may be cause for premature termination form the ATP and possible legal action.

A COPY OF THIS FORM WILL BE A PART OF YOUR PERSONAL FILE
APPENDIX C
UNIVERSITY OF MOUNT UNION ACCREDITED ATHLETIC TRAINING PROGRAM
CODE OF CONDUCT AGREEMENT

By virtue of my signature below, I hereby agree to the following policies and procedures as set forth and approved by the Athletic Training Program Director, Athletic Training Staff and the faculty of Mount Union. Athletic Training Students (ATS) are representing the athletic training profession, the UMU Athletic Training Program (ATP) and Mount Union at all times, even during unsanctioned activities. UMU is a Methodist affiliated institution; therefore, those representing the University are expected to act in a moral, legal and professional manner. Each ATS is expected to conduct his or herself in an ethical manner which is a positive reflection on the ATP and AT profession. This conduct will require the ATS to exemplify high moral standards and excellent reasoning and judgment at all times. In particular;

1. As an ATS, I will abide by the NATA CODE OF ETHICS/UMU ATP Code of Ethics (see www.nata.org and/or ATP Student Handbook). I understand that any violation of the COE, may constitute grounds for disciplinary action, depending on the severity of the infraction, as determined by the ATP disciplinary board. A formal hearing/appeal process will be implemented if such an event should occur.

2. I will abide by the UMU ATP RETENTION AND PROMOTION CRITERIA (see UMU ATP Student Handbook). If I fall below these standards, I understand that I will be placed on probationary status. During this period, my athletic training field experience assignment may be suspended or limited at the discretion of the ATP Director and/or Clinical Coordinator(s). Following the designated probationary period, if I have not rectified the deficiencies, then I realize that dismissal from the ATP may be eminent.

3. I understand that prior to graduation, all CAATE Educational Competencies and Clinical Proficiencies must be successfully completed/documentated at the "Entry-level Master Level". I must also be in good academic standing at the time of my application for the BOC examination. Furthermore, I understand that my endorsement for the BOC exam is at the complete discretion of the ATP Director.

4. I agree that, to insure a well-rounded clinical education and to successfully meet BOC, Inc. requirements, Ohio licensure requirements and/or UMU graduation requirements, I must successfully complete the following:

   REQUIRED: at least six semesters of clinical field experience under the direct supervision of Preceptors (AT, PT, MD, PA, etc.). The required clinical hours must be spread over at least four full semesters, coinciding with the following field experience courses:

   ATP 230 Clinical Practicum
   ATP 232 Clinical Practicum
   ATP 350 Clinical Practicum
   ATP 355 Clinical Practicum
   ATP450 Clinical Practicum
   ATP 455 Clinical Practicum

   REQUIRED: at least one opposite-gender field experience assignment;

   REQUIRED: at least one field experience assignment at an Approved Affiliated High School venue; transportation to and from all off-campus field experience venues is my responsibility.

5. I understand that ATS are not allowed to be utilized as staff or to be paid to perform unsupervised athletic training services. I understand that ATS are not qualified or prepared to perform independently and that ATS can only perform athletic training skills under the direct supervision of a Preceptor while enrolled in a field experience class for academic credit. I further understand that no unsupervised athletic training activity (including traveling with teams) is permitted as a formal part of a field experience course.

6. I realize that my responsibility to my assigned team(s) must be my first priority and that I may have to compromise some part of my pre-season or post-season, if I am involved in athletics or any other extracurricular activities, in order to fulfill my obligation to my athletic training assignment.
7. Typical hours of work for an athletic training student is from 2:30 - 6:30pm plus approximately one hour prior and after athletic contests and may not exceed twenty hours per week. To the best of my ability, I will arrange my academic schedule to insure my availability during these required lab hours. Also, if I have to be absent from field expedience lab time or other classes because of an athletic event, it is my responsibility to be excused by all instructors and to make up any missed work.

8. I realize that my team assignments are in effect for the entire duration of a given sport season (pre-season physicals through the conference championships shall usually constitute the duration of my responsibility), which might mean diminished vacations in August, over intercessions, in May, or during semester breaks. However, field experience conducted outside of the regular semester calendar is non-compulsory, which means I am not obligated to participate when academic semesters are not in session. When my assigned team has a practice and/or contest, it is my ethical obligation to be there, just as if I were a member of the ATP staff.

9. I understand that, as in any health care profession, there exists a risk of being exposed to potentially dangerous body fluids (i.e., blood). I therefore agree to attend required annual blood-borne pathogen seminars and to abide by all OSHA standards regarding universal precautions as they apply to the practices of athletic training. I further agree to accept or formally decline the hepatitis B vaccine, which is provided by the Mount Union Student Health Center.

10. I realize that being an ATS involves a high level of responsibility that coaches, athletes, my fellow ATS and the AT staff depends upon. I realize that unexcused absences, tardiness and being out of uniform will not be tolerated. The following is a summary of disciplinary action to be taken in the event of an attendance and/or dress code indiscretion:

A. Unexcused absence=Disciplinary Action per the ATP Policy for Disciplinary Actions

B. Three-Strike-Rule: = you’re OUT; possible dismissal from the ATP or a reassignment on probationary status.

C. Missed CONTEST without your supervising Preceptor/PD prior permission:
   • ATP Policy for Disciplinary Actions is envoked
   • You may be dismissed from your sport for the duration of the season.
   • You may receive a reassignment with probationary status.

   NOTE: Permission for an excused absence is only given by the Program Director and/or your supervising Preceptor. Medical excuses and/or emergency leave must be documented by the UMU Health Center and/or by the Dean of Students. In the event of any absence, it is your responsibility to insure adequate replacement coverage.

D. DRESS CODE: attending a contest and/or practice session while not in acceptable uniform may affect your over-all evaluation and possibly the grade you receive for the field experience course in which you are enrolled.

   NOTE: A copy of ATP Dress Code can be found in the ATP Student Handbook.

11. Although I will have input by way of request, the field experience assignment in which I am placed will be at the sole discretion of the ATP Clinical Coordinator for ATS assignments.

12. I understand the professional importance of joining the NATA, Inc. as a student member and that membership is required for program admittance. NATA student membership may be applied for online at www.nata.org

13. The UMU ATP has adopted a web-based tracking program called ATrack. This program will more accurately monitor your field experience clock-hours as well as your progress toward completing required educational competencies and clinical proficiencies. ENROLLMENT IN THE ATRACK PROGRAM IS REQUIRED and is included in the cost of my NATA membership.
14. After you are issued an NATA membership number, go to www.atrackonline.com to register.

13. The uniform items that will be issued to me are mine to keep as long as I am an active athletic training student in good standing, or having graduated in good standing. If I leave the ATP prematurely for any reason prior to graduation, the issued uniforms become ATP property and must be returned. I agree to purchase additional uniform articles as I or the staff deems necessary to supplement ATP issued uniforms in order to comply to uniform dress code standards. Furthermore, I understand that the wearing of ATP issued uniform items outside of athletic training related activities is not in good taste and should be avoided diligently.

14. I agree to abide by the laws governing medical confidentiality in all aspects of my exposure to medically sensitive information.

15. I understand that the purchase and maintenance of personal student liability insurance, at my own expense, through the University, is required. Furthermore, I cannot participate in any field experiences unless my policy is current.

16. I understand that maintaining current certifications as a Professional Rescuer CPR and AED Essentials is required. Furthermore, I cannot participate in any field experiences unless these certifications are current.

17. I have read, understand and am willing to abide by the policies set forth in the UMU ATP Student Handbook.

18. I shall strive to treat all individuals as equals and with respect and dignity.

19. I shall refrain from using profanity and vulgarity while performing duties of an athletic trainer.

20. Intimate personal relationships between ATS and team members (coaches and/or athletes) may cause a conflict of interest when making health care decisions of those involved. Plus, it is unprofessional behavior and is therefore discouraged. Public displays of affection, however, will not be tolerated and will be treated as a violation of the NATA Code of Ethics/UMU ATP Code of Ethics referred to above (No.1).

APPENDIX D

UNIVERSITY OF MOUNT UNION
ACKNOWLEDGEMENT OF SITE SPECIFIC TRAINING AND EMERGENCY ACTION PLAN

I, an employee/student in the Athletic Training Program at the University of Mount Union (employer), received site specific training and reviewed the emergency action plan for the following sports with the following preceptors.

During the training program, I received information and training regarding site specific locations and emergency action plans for the locations where I will be working as an athletic training student. During this training important numbers to know, personnel, roles and responsibilities to be delegated, emergency medical staff access, communication, important information to provide to emergency medical staff, and people to notify, were reviewed. I acknowledge that I can locate the emergency action plan if it was needed to be put into effect. The location of the equipment available and the following script were also reviewed:

**Script**

Hello, my name is_____________. I am calling from the University of Mount Union *location*.

We have a victim who suffered a possible *type of injury*.

The victim is *conscious/unconscious*.

We need an ambulance to the *list location and address*.

Someone will meet you at the entrance.

If you need to reach us again please call campus security at (330) 428-1344 or the following number.
APPENDIX E

ACKNOWLEDGEMENT OF SITE SPECIFIC TRAINING AND EMERGENCY ACTION PLAN

APPENDIX K
University of Mount Union
Student Travel Agreement

I understand that, as a condition of my participation in _________________________________
(insert activity/trip name), I am responsible for the following:

1. Fully preparing to participate in this activity/trip, including payment of any necessary fees in a timely manner.

2. Reading, carefully considering, and complying with all materials provided to me by activity/trip coordinators and
advisors, including those that relate to health, safety, emergency procedures and behavioral expectations.

3. Following the schedule of events as provided by the activity/trip coordinators and advisors, and participating as outlined
in the activity/trip expectations.

4. Consulting with my health care provider(s) with regard to any and all medical/mental health matters relating to my
participation in the activity/trip.

5. Obtaining and maintaining appropriate health insurance coverage, which provides coverage for illnesses or injuries I
may experience or sustain while participating in the activity/trip.

6. Informing activity/trip coordinators and advisors of any medical conditions that might adversely affect my safety, or the
safety of other persons participating in the program, including any medical conditions that might require emergency
assistance.

7. Informing my parents/guardian/family and any others who may need to know about my participation in the
activity/trip, providing them with emergency contact information, and keeping them informed of my whereabouts
and activities.

8. Keeping coordinators and advisors informed of my whereabouts and well-being for the duration of the
activity/trip.

9. Obeying all federal, state and local laws for the activity/trip location.

10. Complying with University of Mount Union policies, including those related to the use of alcoholic beverages, and any
additional behavioral expectations established by the activity/trip coordinators and advisors.

11. Accepting responsibility for my own decisions and actions, behaving in a manner that is respectful of the rights and well-
being of others, and encouraging others to behave in a similar manner.

I understand that failure to adhere to the stated behavioral expectations may result in my dismissal from the activity/trip. I
know that, if I am dismissed from the trip/activity, I will be responsible for costs associated with my transportation back to
campus and, if applicable, for reimbursing the University for any expenses incurred for my participation in the activity/trip. In
addition, I am aware that disciplinary charges may be placed against me in accordance with the Student Code of Conduct.

Student: Return this form to your activity/trip coordinator or advisor.
Activity/Trip Coordinator or Advisor: Make 2 copies and send 1 to the appropriate administrator for your
area and 1 to the Dean of Students.
Take the originals with you.
APPENDIX L
UNIVERSITY OF MOUNT UNION
RELEASE, HOLD HARMLESS & INDEMNIFICATION AGREEMENT

The undersigned, ____________________________ (hereinafter the “Participant”), or, if the Participant is a minor under the age of 18 years, the parent(s) and natural guardian(s) or legal guardian(s) of the Participant, does hereby acknowledge the following:

(1) The Participant will be participating in (hereinafter the “Activity”):

(Name of event)

to be sponsored or provided by or otherwise affiliated with University of Mount Union (hereinafter the “University”) during the period of (hereinafter the “Activity Term”):

(Date(s) of event)

(2) The University, its agents or employees may offer transportation to and from locations outside of the University’s campus in conjunction with the Activity;

(3) The Participant’s participation in the Activity and/or access to, use of or participation with the transportation offered by the University, its agents or employees exposes the Participant to certain dangers, hazards, and risks of harm to the Participant’s person and property, of which the undersigned has knowledge, awareness and understanding and, by participating in the Activity, the Participant voluntarily assumes such risks of injury or personal property loss and is responsible for exercising care for the Participant’s own safety and personal property protection;

(4) The University owes the Participant no duty whatsoever, including, without limitation, to warn of dangers present on the University’s campus or in its facilities or at the location or in the facilities in which the Activity shall be located, to make the University’s campus or its facilities or the location or facilities in which the Activity shall be located reasonably safe, or to take any other action or to refrain from any action to enable the Participant to avoid injury or other losses.

IN CONSIDERATION of being permitted to participate in the Activity, the Participant or, if the Participant is a minor under the age of 18 years, the parent(s) and natural guardian(s) or legal guardian(s) of the Participant, does for the Participant, his/her heirs and personal representatives hereby agree to the following:

(a) Release, discharge and forgive the University, its trustees, officers, agents, and employees and all sponsors and its/their shareholders, directors, officers, employees and agents (including instructors and counselors of the Activity) including, but not limited to:

(Specifically name sponsors)

and to indemnify and hold harmless each such individual and entity from and defend against any and all claim, demand or cause of action whatsoever, including attorneys’ fees and court costs, arising out of any personal injury, property damage or death to the Participant or any other person or entity arising out of and/or resulting from the participation of the Participant in the Activity and/or the Participant’s access to, use of, or participation with the transportation offered by the University, its agents or employees;

(b) Waive the protection afforded by any statute or law in any jurisdiction whose purpose, substance, and/or effect is to provide that a general release shall not extend to claims, material or otherwise, which the Participant or, if the Participant is a minor under the age of 18 years, the parent(s) and natural guardian(s) or legal guardian(s) of the Participant, do not know of or suspect to exist at the time of executing this Release;

(c) Agree that if the Participant or the Participant’s heirs or personal representatives file a lawsuit or otherwise present claims due to injuries or losses resultant, or in any way connected with, the Participant’s participation in or involvement with the Activity and/or the Participant’s access to, use of, or participation with the transportation offered by the University, its agents or employees, that such claims shall be immediately dismissed upon the presentation of this Release to the court.

(d) Acknowledge that the use or possession of any personal property is at the sole risk of the Participant and neither the University nor its insurer shall have any liability for the loss, theft, or damage of personal property.

If executing on behalf of a minor Participant, the undersigned represents and acknowledges that he/she has full authority to enter into the within agreement and to bind the undersigned and the minor Participant.
The undersigned attests that the Participant has no physical condition that would in any way limit the ability of the participant to engage in the Activity and anything involved in the Activity. The undersigned further attests that it has disclosed, in writing, to the University any and all medical conditions or limitations afflicting the Participant, recognizing that (i) the University and/or the sponsor of the Activity reserves the right to reject the Participant in appropriate situations; and (ii) regardless of whether the University and/or the sponsor so rejects the Participant, neither the University nor the Sponsor has any responsibility to determine whether the Participant has any medical condition or limitation that would in any way limit the ability of the Participant to engage in the Activity and/or to determine whether any disclosed medical condition or limitation would limit the ability of the Participant to engage in the Activity or would present a risk of serious physical harm or death to the Participant.

By signing this Release, the undersigned hereby certifies that he/she has read the foregoing Release, that he/she have been fully advised by his/her legal counsel with respect to this release (or having been advised of his/her right to counsel, have knowingly waived his/her right to counsel), that he/she knows and understands the contents thereof, and that he/she has signed the same as his/her free act and deed.
