

## Themes Cluster and Course Offerings, 2017-2018 (Rev. 10/2/17)

Below you will find a listing of Themes courses expected to be offered during the 2017-2018 Academic Year. Please note that some courses have prerequisites (not listed) which are determined by departments. Students are not exempt from a prerequisite because they are enrolling in the course to fulfill the Themes requirement. Only the department chair and/or the course instructor may waive any departmentally established prerequisite.

Remember that students may only earn Theme credit for a Themes course if they have junior standing (60 credit hours) or have completed all four Foundations courses. Students must take two courses from the same cluster, with two different course prefixes in order to fulfill the requirement. Also, note that these are “expected” not guaranteed offerings and that some courses might be cancelled. If you notice any errors or omissions from this list, please let us know.

Students who plan to complete one Themes requirement through an approved study abroad program can elect to take ANY other approved Themes course to complete the Themes requirement.

Also, students who encounter difficulty completing a cluster requirement due to limited course offerings should contact the IC Director ([icore@mountunion.edu](mailto:icore@mountunion.edu) | KHIC 233) about finding a suitable replacement course.
