

## E-Resources at the University of Mount Union Library

### Library

This is a brief review of the research resources you can use to enhance your curriculum that are available online. The library has hundreds of thousands of e-resources available to you. The links to these resources are available for you to embed in your student instructions, D2L or emails.

**E-books:** The quickest way to find e-books is to click on “Easy Search” in our catalog. You can further limit your search by adding “electronic book”

Under “Refine Results (left hand side of page), limit the search to “Full Text” and any other relevant limits needed.

In the results of the specific search, under the title click on “Connect to Online Resource”.

Some results will break the e-book into multiple links (per chapter or section). Others will allow you to download the entire PDF.

If you have a “permanent link” option in the top right corner of the results, you should use this link to embed in D2L or send to your students. If a permanent link is not available, it is recommended you send your students to the catalog with the title/author to find the results themselves.

**Journals:** The most effective way to find e-journals is to search for them in databases that best cover your subject area.

## LIBRARY SEARCH

Books	Subject Search	Easy Search	Journals
	<ul style="list-style-type: none"><li>&gt; <a href="#">Art</a></li><li>&gt; <a href="#">Biology and Biochemistry</a></li><li>&gt; <a href="#">Business</a></li><li>&gt; <a href="#">Chemistry</a></li><li>&gt; <a href="#">Communication</a></li><li>&gt; <a href="#">Computer Science</a></li><li>&gt; <a href="#">Criminal Justice and Law</a></li><li>&gt;</li><li>&gt; <a href="#">Earth, Environment Science, and Geology</a></li><li>&gt; <a href="#">Education and Physical Education</a></li><li>&gt; <a href="#">Engineering</a></li><li>&gt; <a href="#">English</a></li><li>&gt;</li></ul>	<ul style="list-style-type: none"><li>&gt; <a href="#">Mathematics</a></li><li>&gt; <a href="#">Music</a></li><li>&gt; <a href="#">Nursing</a></li><li>&gt; <a href="#">Physical Therapy</a></li><li>&gt; <a href="#">Physician Assistant</a></li><li>&gt; <a href="#">Physics</a></li><li>&gt; <a href="#">Political Science</a></li><li>&gt; <a href="#">Psychology</a></li></ul>	

You can find topical e-journals by searching under the “Subject Search” pages on the library homepage or the A-Z Resources also listed there.

Students will need to complete the registration process with their @mountunion.edu email address and then redeem the activation code to successfully unlock Student Plus. Attached is an

If you know the title of your article, you can type it into the OhioLINK search box and it will appear in the format available. It may or may not be available online. If it is not, you can find where the print edition is available for scanning or order a print copy through Interlibrary Loan if it is not at UMU.

**Government Documents** are an online resource without copyright restrictions.

To access resources consider using the following, newly minted search engines available through the A-Z resource list on the library homepage:

**GovInfo** is an excellent resource that includes information on individual publications or collections of content, or view an alphabetical list of collections, publications, other resources, and external partner sites. This site provides free public access to official publications from all three branches of the Federal Government. This online collection has replaced the paper resources formally housed in the library government document area with even more accessible documents.

**MetaLib** is a federated search engine that searches multiple U.S. Federal government databases, retrieving reports, articles, and citations while providing direct links to selected resources available online. If a pdf is not available in the results, you can search the title in Google. Just make certain to include the phrase “government document” in the search box with the title.

**Science.gov** is a gateway to U.S. government science information. The portal offers free access to research and development (R&D) results and scientific and technical information from scientific organizations across 13 federal agencies.

**USA.gov** Research papers, databases, videos, photos, statistics and articles available from the many federal departments and agencies. Search Tip: Use drop down menus to find access under such terms as “data, statistics, reports, research, etc.”
